Instructions for the use of the logbook

Aim of the logbook

- ▶ The purpose of the logbook is to provide one source of evidence that you attained the desired level of competency.
- ▶ It is the place where you are going to document experiences and skills you gained during your training.
- ▶ The logbook is divided into several sections. These instructions will help you completing those sections correctly.

Personnel information

- Please fill in all your personnel information required.
- This help administrators to process your logbook during scientific evaluation
- Your personnel photo should be attached to the logbook and you should sign the personnel information page

Dental cases log

1. You will find lists with all required cases in the curriculum. Your level of participation in each case will be determined by your trainer
2. Patient name is not required. You need to mention the case provisional or final diagnosis
3. for each case write the date of the interview
4. Make a check mark at the appropriate column indicating your level of participation in case management (observer, supervised management of the case or independent management of the case)

5. Each case should be counter signed by your trainer. His signature is the proof of your actual participation

Procedures' log

1. The logbook contains tables for required procedures during different stages of training and the level of desired performance at each stage.
2. You will also find empty tables to write down the procedures, your level of participation and the date.
3. Your trainer should countersign each procedure to document the event

Rotation Proof

It has determined specific rotations in subspecialties that you must go through during the training period (see your curriculum for details). After you finish each rotation sign its block by the Hospital/training center manager and stamp officially.

Internship Course

Course aims :-

Develop clinical communication skills with patients during management of oral and para-oral diseases through the fields of infection control and ethical conduct.
