

## ***“ Got LASER ? ”***

### ***The Problem Solver in Everyday Dentistry***

***LASERs were used in dentistry since 30 years ago but recently they had done a revolution in the dental field especially in Aesthetic and soft tissue applications.***

***On the other hand, LASER can be a magical tool that can shift the treatment plan for a dental procedure 180 degrees into an unexpected results.***

***Their advantages over the conventional methods includes faster operation time, hemostasis, minimal anesthesia, less post-operative pain & better healing.***

***In this presentation we will cover most of the everyday Aesthetic, soft tissue & dental applications that can be done using LASERs in a fast & convenient way. Also, This presentation is going to highlight using of LASER as a conjunctive aid in solving clinical cases that can't be easily done using conventional treatment modalities.***
