

## Egypt IoT Challenge session – TICO Mansura University – Faculty of Engineering Monday, July 15, 2019

### English Announcement

How much do you know about Internet of Things?

As much as the Internet of Things is the revolution behind the technology of the future and expanding to include most of the social and industrial applications, it's very hard to find a universal definition on what is Internet of Things.

We would like to announce a one-day event about IoT and its applications in different sectors, during the session we will expose you to an introductory for the IoT technology and how you can define the difference between IoT solutions among the other similar technologies like AI. Then, you are going to know how to build your first IoT application and what kind of the needed tools to start.

**Waiting for you on July 15 from 1: 4 PM at faculty of engineering (Rashad El-Badrawy Room)**

The session is provided by Egypt IoT Challenge in cooperation with TICO.

Egypt IoT Challenge is a nationwide capacity building and pre-incubation program for High School, Senior University Students and Startups that have innovative ideas in the area of Internet of Things (IoT) and related fields. Website: [www.EgyptIoTChallenge.com](http://www.EgyptIoTChallenge.com)
