Civil Engineering

B.Sc. Program Specification

1. Introduction

1.1 Basic Information

Program Title: Civil Engineering

Program Type: Single

Department: Civil Engineering (Structure, Public Works, and Irrigation and Hydraulics)

Coordinator: Prof. Mohamed Naguib

Assistant Coordinator:

1. Prof. Mahmoud El-Mewafi Ibrahim
2. Prof. Adel Al-Masry

Dates of Program Specification Approval:

1.2 Staff Members:

The Civil Engineering Program is taught by highly qualified staff members. All of them are full time employed. **Appendix 1** shows the staff members' names, resume and the subjects taught by each of them.

1.3 Internal Evaluators:

The program was evaluated by three internal evaluators. Their evaluation showed that the program specification agrees with the National Academic Reference Standards (NARS), **Appendix 2**. Hence, their comments have been taken into account, and approved by the scientific department.

1.4 External Evaluators:

The program was evaluated by two external evaluators. Their evaluation showed that the program specification agrees with the NARS, **Appendix 3**. Hence, their comments have been taken into account, and approved by the scientific department.

2. Professional Data

2.1 Preamble

Engineers solve real-life problems. They find the best solutions through the application of their knowledge, experience and skills. Engineers help to define and refine the way of life by providing innovative, higher-performance, safer, cleaner or more comfortable day-use facilities for human beings. They seek improvement through the processes of invention, design, manufacturing and construction. The engineer's problem-solving complexity grows as the world's social and technological problems become more closely related. The engineering study provides the students with the advanced, effective, technology-based education justifying the expectations of the future of science and technology. It should also provide the technical understanding and problem-solving skills which allow coping with the challenges of tomorrow.

Civil Engineering is the profession that provides the community with a wide range of civil works and structures for better and easier living conditions. Civil engineering programs use mathematics, natural sciences, engineering and human sciences to provide easier life for mankind.

Civil engineer is capable of permanently providing the community with every new and up-to-date development in all civil engineering disciplines through long life learning

2.2 Program Mission and Aims

2.2.1 Program Vision

The mission of the program is to excel in the preparation of a competent graduate in all sub-areas of civil engineering, and to provide service to the community and to make significant contributions to the economic development of the country.

2.2.2 Program Mission

The mission of the Bachelor of Science in civil engineering program is to prepare innovative graduates able to work as planners, designers, construction supervisors, construction managers and consultants for private and governmental firms in disciplines involving structures of all types, building materials, geo-techniques and foundations, roadways and traffic engineering, surveying works, environmental engineering, water and sewerage networks, treatment plants, water resources, hydrology, irrigation and water control structures.

2.2.3 Program Aims

The civil engineering program aims to provide future engineers with appropriate theoretical knowledge and technical skills to respond to professional market demand. The following are the aimed graduate attributes:

1. problem solving and deep understanding based on a fundamental knowledge of humanities, social sciences, mathematics, science, engineering sciences, and a broad range of civil engineering technical areas;
2. consideration of global and societal concerns, ethics, and sustainability when making engineering decisions;
3. leadership and effective communication within a multi-disciplinary environment;
4. society engagement and contributions to society; and
5. pursuit of lifelong learning and professional development.

2.3 Intended Learning Outcomes (ILO's)

2.3.1 Knowledge and Understanding

The graduates of the civil engineering program should be able to demonstrate the knowledge and understanding of:

1. Concepts and theories of mathematics and sciences appropriate to the discipline.
2. Identity Basics of information and communication technology (ICT).
3. Memorize Characteristics of engineering materials.
4. Principles of design including elements design, process and/or a system related to specific disciplines.
5. Methodologies of solving engineering problems, data collection and interpretation.
6. Quality assurance systems, codes of practice and standards, health and safety requirements and environmental issues.
7. Business and management principles relevant to engineering.
8. Current engineering technologies as related to disciplines.
9. Topics related to humanitarian interests and moral issues.
10. Write Technical report.
11. Professional ethics and impacts of engineering solutions on society and environment
12. Contemporary engineering topics.
13. Engineering principles in the fields of reinforced concrete and metallic structures' analysis and design, geo-techniques and foundations, hydraulics and hydrology, water resources, environmental and sanitary engineering, roadways and traffic systems, surveying and photogrammetry.
14. Properties, behavior and fabrication of building materials.
15. Projects and construction management including planning, finance, bidding and contracts.

2.3.2 Intellectual Skills

The graduates of the civil engineering program should be able to:

1. Select appropriate mathematical and computer-based methods for modeling and analyzing problems.
2. Select appropriate solutions for engineering problems based on analytical thinking.
3. Think in a creative and innovative way in problem solving and design.
4. Combine, exchange, and assess different ideas, views, and knowledge from a range of sources.
5. Assess and evaluate the characteristics and performance of components, systems and processes.
6. Investigate the failure of components, systems, and processes.
7. Solve engineering problems, often on the basis of limited and possibly contradicting information.
8. Select and appraise appropriate ICT tools to a variety of engineering problems.
9. Judge engineering decisions considering balanced costs, benefits, safety, quality, reliability, and environmental impact.
10. Incorporate economic, societal, environmental dimensions and risk management in design.
11. Analyze results of numerical models and assess their limitations.
12. Create systematic and methodic approaches when dealing with new and advancing technology.
13. Select appropriate building materials from the perspective of strength, durability, suitability of use to location, temperature, weather conditions and impacts of seawater and environment
14. Select and design adequate water control structures, irrigation and water networks, sewerage systems and pumping stations
15. Analyze and select codes of practices in designing reinforced engineering concrete and metallic structures of all types. Determine the levels, types and design systems of building foundations, tunnels and excavations
16. Define, plan, conduct and report management techniques
17. Assess and evaluate different techniques and strategies for solving engineering problems.

2.3.3 Practical and Professional Skills

On successful completion of the program, the graduates of the civil engineering program should be able to:

1. Apply knowledge of mathematics, science, information technology, design, business context and engineering practice integrally to solve engineering problems.
2. Professionally merge the engineering knowledge, understanding, and feedback to improve design, products and/or services.
3. Create and/or re-design a process, component or system, and carry out specialized engineering designs.
4. Practice the neatness and aesthetics in design and approach.
5. Use computational facilities and techniques, measuring instruments, workshops and laboratory equipment to design experiments, collect, analyze and interpret results.
6. Use a wide range of analytical tools, techniques, equipment, and software packages pertaining to the discipline and develop required computer programs.
7. Apply numerical modeling methods to engineering problems.
8. Apply safe systems at work and observe the appropriate steps to manage risks.
9. Demonstrate basic organizational and project management skills.
10. Apply quality assurance procedures and follow codes and standards.
11. Exchange knowledge and skills with engineering community and industry.
12. Prepare and present technical reports.
13. Use laboratory and field equipment competently and safely
14. Observe, record and analyze data in laboratory and in the field
15. Practice professionally construction management skills. Prepare technical drafts and detailed drawings both manually and using CAD
16. carry out maintenance of all types of roadways and traffic systems
17. Prepare quantity surveying reports
18. Plan, design, construct, operate, control and carry out maintenance of all types of roadways and traffic systems.

2.3.4 General and Transferrable Skills

The graduates of the civil engineering program should be able to:

1. Collaborate effectively within multidisciplinary team.
2. Work in stressful environment and within constraints.
3. Communicate effectively.
4. Demonstrate efficient IT capabilities.
5. Lead and motivate individuals.
6. Manage tasks and resources efficiently.
7. Search for information and adopt life-long self learning.
8. Acquire entrepreneurial skills.
9. Refer to relevant literature effectively.

2.4 Curriculum Structure and Contents

2.4.1 Program Contents:

The program duration is five years, 10 semesters. The following are the subjects taught during this program.

2.4.2 Curriculum Mapping

The following table gives the contribution of the individual courses to the program Intended Learning Outcomes in a matrix form. This matrix was developed by the program coordinator, assistant coordinators and professional staff members. The mapping matrix shows that the program courses present balanced contribution to the program ILO's includes also two tables summarizing the program ILO's contributed by the individual courses and the courses contributing to the individual ILO's.

▪ Preparatory Year-First Semester:

The above table shows the agreement with NARS requirements.

2.4.3 Courses Specifications

The detailed program courses specifications are given. These courses specifications were revised and approved on 2010. The contribution of each course to the program ILO's were considered during this revision.

3. Program Admission Requirements

- 1- Secondary School Certificate Graduates of other countries are eligible to join this program if they met the minimum grades set by Admission Office of the Ministry of Higher Education.
- 2- The study begins with a preparatory year for all students before specialization in civil Engineering. Students' departmental allocation is in accordance with the Faculty Council regulations.

4. Regulations for Progression and Program Completion

Attendance of program is on full-time basis.

- 1- A student may be transferred to a following academic year if s/he passes all attended courses but a maximum of two in accumulation – excluding humanity or cultural courses.
- 2- The humanity and cultural courses are not counted as non-passing courses, but have to be completed before graduation.
- 3- The study follows the semester system with two semesters per year, 15 weeks each.
- 4- The time for the Bachelor degree is four years preceded by a preparatory year.
- 5- A minimum of 75 % student attendance to lectures, tutorials and laboratory exercises per course is conditional for taking the final exams, in accordance with the Departmental Board recommendation approved by the Faculty Council, otherwise students would be deprived from taking their final exam(s).
- 6- The student is entitled to re-set failed exam(s) with fellow-students undertaking the course(s) in following term(s).
- 7- A 65%+ score in re-set exam(s) is reduced to a ceiling of "Pass" grade, except for acceptable excuses.
- 8- Final-year students who fail no more than two courses plus any number of humanity cultural courses are re-examined in November.
- 9- If they fail re-set(s), they are entitled to be re-examined with fellow-students undertaking the course(s) in following term(s).
- 10- Except for those in final-year, students who provide evidence of successfully completing particular courses in parallel academic institutions, which are recognized by the Ministry of Higher Education, may be exempted from attending these courses. This may only take place after a decision from the Academy Chairman, following the Education & Student Affairs Council and the Faculty and Departmental Boards approval respectively; with no desecration of Article (36) of University Regulation Law.

-
- 11- The course which is taught in one semester and has one examination mark and more than examination answer sheets, is treated as one-course as regards the course evaluation.
- 12- If a course includes written and oral / lab tests, the course evaluation is made according to the total mark of all tests in addition to the academic standing throughout the year.
- 13- No mark is recorded for the student who fails to appear in the written examination.
Appendix 4 gives the details of program progression and grades evaluation.

5. Student Assessment (Methods and rules for student assessment)

Method (tool)	Assessed ILO's
1- Written exam	A, B & C
2- Quizzes and reports	A, B & C
3- Oral exams	A, B & C
4- Practical	A & C
5- Project applied on a practical field problem	A, B, C & D

6. Program Evaluation

Evaluator	Tool
1- Senior students	questionnaire
2- Alumni	questionnaire
3- Stakeholders	questionnaire
4- Internal Evaluator(s) (External Examiner (s))	report
5- External Evaluator(s)	report
6- Other societal parties	None

Account of appreciation and rules easing the monitoring committees grades

وزير التعليم العالي والدولة للبحث العلمي ورئيس المجلس الأعلى للجامعات.

- بعد الإطلاع على القانون رقم (٤٩) لسنة ١٩٧٢ في شأن تنظيم الجامعات والقوانين المعدلة له .
- وعلى قرار رئيس الجمهورية رقم (٨٠٩) لسنة ١٩٧٥ بإصدار اللائحة التنفيذية لقانون تنظيم الجامعات والقرارات المعدلة له .
- وعلى القرار الوزاري رقم (٦١٣) بتاريخ ١٩٩٧/٦/١٠ بشأن إصدار اللائحة الداخلية لكلية الهندسة جامعة المنصورة والقرارات المعدلة له .
- وعلى موافقة مجلس جامعة المنصورة بجلسته بتاريخ ٢٠٠٤/٥/٣١ . ٢٠٠٤/٩/٢٨، ٢٠٠٤/٤/٣١
- وعلى موافقة لجنة قطاع الدراسات الهندسية بجلستها بتاريخ ٢٠٠٤/٧/٢٩ .
- وعلى قرار المجلس الأعلى للجامعات بجلستها بتاريخ ١٩٩٨/٩/١٠ تفويض السيد الأستاذ الدكتور / وزير التعليم العالي والدولة للبحث العلمي ورئيس المجلس الأعلى للجامعات في الموافقة على إصدار اللوائح الداخلية لكليات ومعاهد الجامعية وتعديلاتها .

قرر

المادة الأولى

يعمل باللائحة الداخلية المرفقة والخاصة بكلية الهندسة - جامعة المنصورة ويلغى كل نص يخالف أحكامها .

المادة الثانية

على جميع الجهات المختصة تنفيذ هذا القرار .

وزير التعليم العالي
والدولة للبحث العلمي

أ.د/ عمرو عزت سلامة

الباب الثاني

الدراسة للبكالوريوس

مادة ٣: يمنح الطالب درجة البكالوريوس في الهندسة في أحد التخصصات الهندسية الآتية: هندسة الإلكترونيات والاتصالات

وذلك بعد اجتياز الامتحانات في المقررات الدراسية المنصوص عليها في الباب الرابع من هذه اللائحة بنجاح.

مادة ٤: يقييد الطالب لدرجة بكالوريوس الهندسة في إحدى الشعب العلمية إذا كان الطالب حاصلًا على شهادة الثانوية العامة أو ما يعادلها، وفقاً للمادة (٧٥) من قانون تنظيم الجامعات.

مادة ٥: الدراسة بأقسام الكلية أربع سنوات ، تسبقها سنة إعدادية لجميع الطلاب وتقسم السنة الدراسية إلى فصلين ينتهي كل منهما بامتحان وذلك طبقاً لما هو وارد بجدول المقررات الدراسية الملحق بهذه اللائحة.

مادة ٦: يدرس الطالب المقررات الموزعة على الفصول الدراسية والواردة في جداول المقررات الدراسية بالباب الرابع من هذه اللائحة والموضح بها الساعات المخصصة للمحاضرات والتمارين النظرية والعملية، وال نهايات العظمى للدرجات موزعة على أعمال الفصل، والاختبارات العملية أو الشفهية والامتحان التحريري آخر الفصل الدراسي وعدد ساعات الامتحان النهائي ، ويقرر مجلس الكلية المحتوى العلمي لكل مقرر من مقررات الدراسة بعد تطويره بواسطة مجالس الأقسام العلمية المختصة طبقاً للمادة (٤١) من قانون تنظيم الجامعات.

مادة ٧: يجوز إعفاء الطالب من حضور بعض المقررات الدراسية عدا مقررات الفرقـة الثالثـة والرابـعة إذا ثبت أنه حضر مقررات دراسـية تعادـلـها بالـكلـيـة أو فيـ كـلـيـة جـامـعـية أو معـهـد علمـي معـرـفـاـ بهـ، ويـكون الإـعـفـاء بـقـرـارـ منـ رـئـيسـ الجـامـعـة بـعـدـ موـافـقـةـ مجلسـ شـنـونـ التـعـلـيمـ وـالـطلـابـ بـنـاءـ عـلـىـ اـقـتـراـجـ مـجـلـسـ الـكـلـيـةـ بـعـدـ أـخـذـ رـأـيـ مـجـلـسـ الـقـسـمـ الـعـلـمـيـ الـمـخـتـصـ، وـذـاكـ وـفـقاـ لـلـمـادـةـ (١٧٠ـ)ـ منـ قـانـونـ تـنـظـيمـ الـجـامـعـاتـ.

مادة ٨: يؤدى الطالب امتحاناً في نهاية كل فصل دراسي طبقاً لجدول المقررات الدراسية بالباب الرابع من هذه اللائحة.

مادة ٩: يحرم الطالب من التقدم لأداء الامتحان في كل أو بعض المقررات بقرار من مجلس الكلية بناءً على طلب مجالس الأقسام العلمية المختصة وذلك إذا كانت مواظبيته في حضور المحاضرات والتمارين تقل عن ٧٥٪ من مجموع الساعات الفعلية

ويعتبر الطالب في هذه الحالة راسبا في المقررات التي حرم من التقدم لأداء الامتحان فيها إلا إذا قدم عذرا يقبله مجلس الكلية فيعتبر غائبا بعدر مقبول.

مادة ١٠ : تشمل درجات الطالب في المقررات التي تتضمن امتحانا تحريريا وشفهيا و / أو عمليا مجموع الدرجات التي يحصل عليها في الامتحان التحريري والشفهي و / أو العملي بالإضافة إلى أعمال الفصل كما هو وارد في جداول المقررات الدراسية، ويعتبر الطالب الذي لم يجد الامتحان التحريري في نهاية الفصل في أحد المقررات غائبا بدون عذر في هذا المقرر ويصبح راسبا، إلا إذا قدم عذرا مقبولا فيعتبر غائبا بعدر مقبول.

مادة ١١ : يقدر نجاح الطالب في المقررات وفي التقدير العام بأحد التقديرات الآتية:

ممتر	من %٨٥ إلى %١٠٠	من النهاية العظمى للدرجات
جيد جدا	من %٧٥ إلى أقل من %٨٥	من النهاية العظمى للدرجات
جيد"	من %٦٥ إلى أقل من %٧٥	من النهاية العظمى للدرجات
مقبول	من %٥٠ إلى أقل من %٦٥	من النهاية العظمى للدرجات

ويكون الطالب راسبا في المقررات إذا حصل على أقل من %٥٠ من النهاية العظمى لمجموع درجات المقرر وذلك على النحو التالي:

ضعيف	من ٣٠ % إلى %٥٠	أقل من %٥٠	من النهاية العظمى للدرجات
ضعيف جدا	أقل من %٣٠	أقل من %٣٠	من النهاية العظمى للدرجات

ولا يزيد تقدير الطالب على مقبول في المقرر الذي سبق إن رسب فيه أو تغيب عنه بغير عذر مقبول.

مادة ١٢ : ١ - ينقل الطالب من الفرقة المقيد بها إلى الفرقة التي تليها إذا نجح في جميع المقررات أو كان راسبا فيما لا يزيد عن مقررين من مقررات جميع الفصول الدراسية السابقة للفرقة المنقول إليها وتعتبر المادة المتصلة مقررا واحدا.

ب - بالإضافة إلى المقررين المشار إليهما في الفرقة السابقة يسمح للطالب الراسب في مقرر إضافي ثالث في الإنسانيات بالنقل إلى الفرقة التالية، على أن يؤدى الطالب الامتحان في مواد التخلف طبقا للنظام الذي يضعه مجلس الكلية.

ج - الطالب الراسب في مادة متصلة يعيد الامتحان في المادة كلها.

مادة ١٣ : يقوم طلاب الفرقة الرابعة بإعداد مشروع بكالوريوس في موضوعات معينة تحددها مجالس الأقسام العلمية المختصة وذلك خلال العام الدراسي، ثم تخصص للمشروع فترة لا تقل عن أربعة أسابيع تبدأ عقب الانتهاء من الامتحان التحريري وتكون تحت إشراف أعضاء هيئة التدريس طبقاً للائحة تنفيذية داخلية يعدها مجلس الكلية بناءً على توصيات مجالس الأقسام العلمية المختصة لتنظيم إعداد المشاريع والإشراف عليها ومناقشتها.

مادة ٤ : يعقد امتحان دور ثان في شهر أكتوبر لطلاب الفرقة الرابعة الراسبين أو الغائبين فيما لا يزيد عن مقررين بالإضافة إلى أحد مقررات الإنسانيات الراسبين فيها، باستثناء مشروع البكالوريوس حيث يصبح الطالب الراسب فيه باق للإعادة.

مادة ٥ : يخصص لطلاب الفرقة الثالثة والفرقة الرابعة في جميع الشعب رحلات علمية تحت إشراف أعضاء هيئة التدريس لزيارة الأماكن الوثيقة الصلة بالدراسة والمشروع ، وذلك طبقاً للنظام الذي يقررها مجلس الكلية بناءً على توصيات الأقسام العلمية المختصة.

مادة ٦ : تشمل الدراسة نظاماً للتدريب لمدة أربعة أسابيع خلال العطلة الصيفية تحت إشراف أعضاء هيئة التدريس للطلاب المنقولين إلى الفرقة الثانية والفرقة الثالثة والفرقة الرابعة وذلك على النحو الآتي:

تدريب مهنى: يؤدي الطلاب المنقولين إلى الفرقة الثانية تدريباً مهنياً داخل الكلية أو في مراكز التدريب المتخصصة.

تدريب ميدانى : يؤدي الطلاب المنقولين إلى الفرقة الثالثة والطلاب المنقولين إلى الفرقة الرابعة تدريباً ميدانياً داخل القطاعات المتخصصة.

ويجوز تدريب الطلاب خارج الجمهورية بناءً على موافقة مجلس القسم العلمي المختص.

ولا يحصل الطالب على شهادة البكالوريوس إلا إذا أدى بنجاح كلًا من التدريبين المهني والميداني.

ويصدر مجلس الجامعة اللائحة التنفيذية الخاصة بتدريب الطلاب وذلك بناءً على توصيات مجالس الأقسام العلمية المختصة وأقتراح مجلس الكلية وموافقة مجلس شئون التعليم والطلاب.

الباب الثالث

الأحكام الانتقالية

مادة ١٧ : تطبق اللائحة بالتتابع ابتداء من العام الجامعى التالى لإقرارها على جميع الطلاب المقيدين بالفرقة الإعدادية المستجدين والباقين للإعادة فيها ويستمر العمل باللائحة السابقة الصادرة بالقرار الوزارى رقم ٦١٣ لعام ١٩٩٧ وتعديلاتها على باقى الطلاب المقيدين بالكلية لحين انتهاء دراستهم بها.
