

Clinical Decision-making

TRAUMA

Trauma

A farmer is brought into a hospital emergency department late at night. He has been assaulted.

Trauma

Trauma

Scenario 1

Scenario 2

Scenario 1

He is not able to give a useful history other than that his right eye is sore and blurred.

Q1: What should you do?

Scenario 1

Q2: What is shown here ?

Scenario 1

Q3: What is the management?

Scenario 2

There are multiple facial lacerations, some of which contain fragments of glass. It seems that he has been struck with a bottle. There is almost no sight at all in the right eye together with hypotony.

Scenario 2

Q 4 : What is your diagnosis?

Q 5: What management is required?

Thank You
