Certification

To Whom It May Concern:

This is to certify that Dr. Khaled Abouelkhair is holding a PhD degree in Clinical Oncology as well as the position of lecturer of Clinical Oncology at Mansourah University, Egypt. He joined our scientific research team at IMC, Jeddah two years ago. During this period he showed a very solid scientific background, good knowledge of research methodologies and statistical analysis together with creative research ideas which encouraged us to involve him more and more in our research center activities.

His tremendous efforts together with the other team members in the research field were translated into many valuable scientific publications in the field of oncology in well-known international medical journals. Dr. Abouelkhair is currently leading our group in an international research project with an Italian group specialized in advanced bio- molecular research in colon cancer. He is also actively participating in many of the oncology scientific activities either as a participant or a member of the committee.

I wish him the best in his scientific career and welcome his efforts in the research field at any time.
