**Course Specification 2015/2016**  
**Public Health & Community Medicine**

**Faculty :** Medicine  
**Department :** Public Health & Community Medicine

**Course Specification:**

Programme(s) on which the course is given : M.B.B.Ch program  
 Department offering the course : Public Health & Community Medicine  
 Academic year / level : 4<sup>th</sup> year  
 Date of specification approval : 23/3/2016

**A- Basic information:**

Title: Medical Physiology Code: **COM**  
 Lecture: **128** Tutorial: **10** Practical **54** Total: 192

**B- Professional Information:**

**1 - Overall Aims of Course**

Overall Aims of Course are to develop a graduate who will:

1. Adopt and apply a healthy lifestyle & sound behaviors to become role models for the individuals, families, & communities they will serve in the future.
2. Recognize the outstanding programs of medical care to serve society & to promote environmental sanitation & development.
3. Apply basic principles of scientific research.

**2 – Intended Learning Outcomes of Course (ILOs)**

**A - Knowledge and Understanding:**

By the end of the course, students should be able to:

- A 1. Define epidemiology & determinants of communicable & non communicable diseases & health problems, presented throughout the age spectrum.
- A 2. Identify the prevalent health problems in a community, using various epidemiological strategies.
- A 3. Recognize trends in health & disease.
- A 4. Enumerate behavioral & social variables impacting health & disease.
- A 5. Discuss principles of disease prevention & early detection of common community health problems including nutritional, occupational & environmental health-related problems.
- A 6. Recognize the principles & organization of National Health Care System.
- A 7. Define the epidemiological principles of demography & biological variability.
- A 8. List the principles of disease surveillance & screening.
- A 9. Identify measures of communicable diseases control & health promotion.
- A 10. Demonstrate population-based approaches to health care services & their role in improving medical practice.

**B- Intellectual Skills:**

By the end of the course, students should be able to:

- B 1. Design prevention & control programs for communicable & non communicable health problems of special public concern.

- B 2. Apply appropriate health education methods & materials.
- B 3. Evaluate data from literature, using information technologies & library resources, to help solving a clinical problem based on evidence (EBM).
- B 4. Construct a proper research design to study health problems of public concern.
- B 5. Analyze data using simple statistical methods to evaluate indicators of health & disease.
- B 6. Criticize research work with constructive feedback.

#### **P-Professional and Practical Skills:**

By the end of the course, students should be able to:

- C1. Apply suitable measures for prevention & control of communicable & non communicable diseases.
- C2. Apply risk assessment methods to health problems to determine strategies for appropriate response.
- C3. Apply basic satatistical principles to collect, analyze & interpret medical data.

#### **T- General and Transferable Skills:**

By the end of the course, students should be able to:

- D1. Adopt principles of the lifelong learning needs of the medical profession.
- D2. Use information & communication technology effectively in the field of public health.
- D3. Manipulate information related to public health problems by all means, including electronic means with its presentation in written & oral forms.
- D4. Work effectively within a team with respect to colleagues involved in teaching .

#### **E- Professional attitude:**

By the end of the course, students should be able to:

- E1. Ensure the cost effectiveness of health care management.
- E2. Respect the rules and regulation for ethical process and ensure patient safety.

#### **F- Communication skills:**

By the end of the course, students should be able to:

- F1. Communicate effectively with individuals regardless of their social, cultural, ethnic backgrounds, or their disabilities.
- F2. Cope with situations where communication is difficult including breaking bad news.

### **3 – Contents:**

Topic	No. of hours	Lecture	Tutorial/Practical
Principles of communicable diseases studies	20	10	10
Epidemiology of some selected communicable diseases	38	30	8
Epidemiology of some selected Non- communicable diseases	14	14	2
Principles of Health Care Management	12	8	4
Management of Specific Health Care Services	29	18	11
Communication, Health Behavior, and Health Education	11	8	3
Environmental Health	9	6	3
Occupational Medicine	22	12	8
Nutrition	11	8	3
Research and Medical Statistics	25	14	11
Total	192	128	64

#### 4 – Teaching and Learning Methods

1. **Lectures:** in the lecture hall at Public Health & Community Medicine Department at the 1<sup>st</sup> floor of Block C using Data show & blackboard.
2. **Workshops:** Plenary session in lecture hall for 45 minutes.
3. **Small group teaching:** 5 groups of 60 students, each in a teaching room at the department.

4. **Training exercises:** for (45min) through distributing variety of training exercises to be solved in the small groups (15 students each) using a white board for each subgroup. Students have to complete the logbook of the corresponding topic together with some of the training exercises under supervision of a tutor.
5. **Field visits:** to Water Purification Station, Blood Bank, Family health unit/ center, Fever Hospital, & Chest Hospital, Nitrogenous Fertilizer Industry. **About 21 hours of field visits**
6. **Self-learning students** are divided into 30 groups (10 students each); each group is issued a topic for working as a team to produce a power point presentation and present them in front of their peers and senior staff. A soft copy of presentation is collected at the end of the round.

### **5 – Student Assessment Methods**

- |                                  |           |  |
|----------------------------------|-----------|--|
| 1- MCQ exams (Round, Final)      | To assess | Knowledge, intellectual, Practical                                       |
| 2- Continuous assessments (Quiz) | To assess | Intellectual skills  |
| 3- Students Presentation         | To assess | General and transferable, professional attitude and communication Skills |
| 4- Objective written examination | To assess | Knowledge, intellectual, Practical                                       |
| 5- Structured Oral examination   | To assess | Practical, general and transferable & intellectual skills                |

Assessment Schedule:

<b>Assessment 1</b>	Logbook completion	During the round	6 marks	2%
<b>Assessment 2</b>	Continuous Assessment (Quiz)	During the round	14 marks	4.7%
<b>Assessment 3</b>	Round MCQ	At end of the round	40 marks	13.3%
<b>Assessment 4</b>	Final Written exam (2papers)	At the end of academic year	150 marks	50%
<b>Assessment 5</b>	Final MCQ Exam	At the end of academic year	60 marks	20%
<b>Assessment 6</b>	Final Structured Oral Exam	At the end of academic year	30 marks	10%
<b>Total</b>			300 marks	100%

### **6 – List of References**

- 1- Course Notes.
- 2- Essential Books (Text Books) - Public Health & Community Medicine Volume I, II & III  
- Practical Activity Book.
- 3- Recommended Books - Public Health & Preventive Medicine: Wallace/Maxy-Rosenau- Last, 15<sup>th</sup> Edition.
- 4- Periodicals, Web Sites, etc [www.who.int](http://www.who.int), [www.cdc.gov](http://www.cdc.gov), [www.fda.org](http://www.fda.org)

### **7 – Facilities Required for Teaching and Learning:**

1. **Lecture hall:** equipped with Blackboard, Data show, Computer, LCD projector, Wireless phones, LASER pointer, & it is air conditioned.
2. **Halls for students' small group teaching:** equipped with white boards & data show.
3. **Field visits:** to Blood Bank, Chest Hospital, Fever Hospital, Family health unit/ center, Water Purification Station & Nitrogenous Fertilizer industry.

## **Vision**

Promotion of Outstanding Programs of Medical Care to Serve Society & to  
Promote Environmental Development

## **Mission**

Development of an Outstanding, Honorable Practitioner, Capable of Providing  
International Standards of Medical Care & Following Medical Ethics

## **Preface**

**Dear students,**

**The Practical Activity Book** is a guide for the fourth year medical students to enhance the specific skills and/or knowledge which should be acquired from careful reading & study of the assignments.

It constitutes an outline which initially conveys the major points or target areas of **The Public Health & Community Medicine** to be studied. Then, after the course is completed, the objectives serve as a review & check for the students, who can use them to determine if sufficient gains have been made in skills and/or understanding.

Practice exercises & solving problems are included within each topic to help students to apply the topic content. Answers to these exercises are valuable study guides for the final examination.

It is our sincere hope that you will find this work to be a profitable & satisfying one. We seek your constructive criticism at all times & ask that you let us know whenever you have problems or need assistance. We shall follow your progress with keen interest.

**Head of the Department**

**Prof. Mohamed Azmy Khafagy**

## **Curriculum Content**

### **Public Health & Community Medicine Course:**

- **Lecture:** 128 hours
- **Tutorial:** 10 hours
- **Practical:** 54 hours

### **Academic Teaching Material:**

1. Principles of Communicable Diseases Studies
2. Epidemiology of Some Selected Communicable Diseases
3. Epidemiology of Some Selected Non-communicable Diseases
4. Principles of Health Care Management
5. Management of Specific Health Care Services
6. Communication, Health Behavior, & Health Education
7. Environmental Health
8. Occupational Medicine
9. Nutrition
10. Research & Medical Statistics

### **Tutorial & Practical Material:**

1. Epidemiologic Methods
2. Measurements of Health
3. Medical Statistics
4. Communication & Health Behavior
5. Health Education
6. Investigation of an Outbreak
7. Prevention & Control of an Outbreak
8. Epidemiology of Some Selected Communicable Diseases
9. Blood Bank
10. Health Care Management
11. Health Care Quality Management
12. Primary Health Care Services
13. Occupational Health
14. Water & Health
15. Nutrition in Health & Disease

**Intended Learning Outcomes of Course (ILOs)**

**[1] Knowledge & Understanding:**

1. Understand the epidemiology & determinants of communicable & non-communicable life threatening illnesses affecting the body & each of its major organ systems, presenting throughout the age spectrum.
2. Identify the prevalent health problems in a community, using various epidemiological strategies.
3. Recognize trends in health & disease.
4. Enumerate & interpret behavioral & social variables impacting health & disease.
5. Identify the risk factors, principles of disease prevention & early detection of common community health problems including nutritional, occupational & environmental health related problems.
6. Get insights concerning the principle & organization of National Health Care System.
7. Recognize epidemiological principles of demography & biological variability.
8. List the principles of disease surveillance & screening.
9. Understand communicable disease control & health promotion.
10. How to utilize the population-based approaches to health care services & their role in improving medical practice.

**[2] Intellectual Skills:**

1. Design prevention & control programs for communicable & non-communicable health problem of special public concern.
2. Select & use appropriate health education methods & materials.
3. Apply risk assessment methodology to diverse of health problems & or injuries, to determine strategies for appropriate response.
4. Evaluate relevant & current data from literature, using information technologies & library resources, in order to help solve a clinical problem based on evidence (EBM).
5. Apply research & statistical methods in studying health problems of public concern
6. Formulation of research questions that is pertinent to medicine.
7. Precisely collect, analyze & interpret medical data.

**[3] Professional skills:**

1. Adopt suitable measures for prevention & control of communicable & non-communicable diseases.
2. Utilize communication skills & health education messages in patient care & apply appropriate infection prevention practices/ universal precautions.

**[4] General & Transferable Skills:**

1. Use information & communication technology effectively in the field of public health & preventive medicine.
2. Retrieve, manage, & manipulate information by all means, including electronic means.
3. Present information related to public health problems clearly in written, electronic & oral forms.
4. Communicate ideas & arguments effectively.
5. Work effectively within a team, respect patients, their relatives, senior & other colleagues involved in his teaching & subsequently in his future practice.
6. Analyze & use numerical data including the use of simple statistical methods & evaluate indicators of health & disease.
7. Evaluate their work & that of others using constructive feedback.

**Method of Assessment:**

1. **End of Round:** 60 marks
  - Pratical book activities ..... 6 marks
  - Continuous assessment (Quizzes) ..... 14 marks
  - Round MCQ & Multistations exam..... 40 marks
2. **Final Written exam (2papers):** ..... 150 marks
  - Time of written exam: (1.5 hour/ paper)
  - Type of written exam: short essay questions
3. **Final Oral Exam:** ..... 30 marks
4. **Final MCQ Exam:** ..... 60 marks

**Total (300 marks)**

## **Table of Contents**

<b>Item</b>	<b>Topic</b>	<b>Page</b>
1	Epidemiologic Methods	1
2	Questionnaire	5
3	Hospital Statistics	7
4	Medical Statistics	9
5	Measurements of Health	12
6	Communication & Health Education	15
7	Investigation of an Outbreak	16
8	<b>Epidemiology of Some Selected Communicable Diseases</b>	
8.1	Tuberculosis	18
8.2	Meningococcal Meningitis	20
8.3	Diarrheal Diseases	21
8.4	Infection Control Measures	23
9	Blood Bank	24
10	Health Care Quality Management	26
11	Maternal & Child Health Care (MCH)	28
12	Expanded Program on Immunization (EPI)	30
13	<b>Occupational Health</b>	
13.1	Occupational Devices	32
13.2	Personal Protective Equipment (PPE)	37
13.3	Ergonomics	40
14	Water & Health	41
15	Waste	42
16	Nutrition in Health & Disease	43
17	Surveillance for NCDs	45
18	Traffic Injuries	46
	Student Field Visit Forms	47

Visit Form

### **Tuberculosis (Chest Hospital)**

1. Comment on the following items of hospital design:

1.1 Site of the building     Suitable     Not suitable

1.2 Number of departments    .....

1.3 Are the inpatient services in a separate building from outpatient?

YES     NO

2. What are diseases treated by & admitted to chest hospital during your visit?

.....  
.....  
.....

3. What are the preventive measures applied for different respiratory diseases?

.....  
.....  
.....

4. Is **BCG** vaccine available in the hospital?     YES     NO

- Target groups for **BCG** vaccination are:

.....  
.....  
.....

5. Is there a health education message given to patients with chest disease in general & TB patient in particular?     YES     NO

**If yes, what is it?**

.....  
.....  
.....

6. Is there screening test done for detection of T.B?     YES     NO

**If yes, what is it?**

.....  
.....

---

**Tutor Signature**

7. Steps done to confirm the diagnosis of T.B

.....  
.....  
.....

8. What are the most common findings in X-ray of T.B patients?

.....  
.....  
.....

9. Concerning **Tuberculin test**, complete the following:

**1. Indications of the test:**

- |        |        |
|--------|--------|
| a..... | c..... |
| b..... | d..... |

**2. Interpretation of the test:**

.....  
.....  
.....  
.....

10. What is meant by **DOTS** strategy? Is it practically applied?

.....  
.....  
.....

11. What are the available anti-TB drugs in the hospital?

.....  
.....

12. What are the methods used for sputum disinfection in chest hospital?

.....  
.....

13. What are the discharge criteria of a T.B patient from chest hospital?

.....  
.....  
.....  
.....  
.....

## Blood Bank

**1. What are the duties of the blood bank?**

.....

.....

.....

**2. What is meant by provision of safe effective blood & blood products?**

-Safe blood/ products is .....

-Effective blood/ products is .....

**3. Comment on the following items of blood bank structure:**

Item		Present	Absent
<b>Structure:</b>	Suitable site		
	Special departments		
	Toilet for staff		
	Toilet for patients		
	Vehicles		
	Communication equipment (Telephone, Fax. E-mail)		
	Cafeteria		
	Conference hall (seminar)		
	Stores		
	Incinerator		
	Central air conditioners		
	Generators (Emergency power supply		
	Safety measures for fire		
	Refrigerators for Blood Storage		
	Audible alarm system in refrigerator		
	Autoclave with temp. & pressure display		
<b>Manpower:</b>	Medical Officer Manager		
	Doctors		
	Staff Nurses		
	Lab Technician		
	Administrative Staff		
	Drivers		
	Recruiters		
	Medical registers		
	Cleaning workers		
<b>Departments (services)</b>			
<b>Donation department</b>			
	Donor education/ motivation material		
	Donors beds, chairs ,tables		
	Recovery bed for donors

---

<b>Donor record details:</b> (Age, Interval between donations, Viral infection, History of chronic diseases, Transfusion history)			
<b>Privacy for medical examination of donor</b> (Weight, Haemoglobin, BP, Pulse)			
Pediatric Bags			
<b><u>Serology department</u></b>	Hepatitis & HIV tests		
	Syphilis test		
	Malaria test		
	Informing donors in case of +ve results		
	Followed up of HbsAg/ HIV +ve donors		
<b><u>Components department:</u></b>	Air-conditioned Blood component room		
	Well lighted Blood component room		
	Separation of blood components to Packed RBC, platelets concentrates & fresh Frozen Plasma		
<b><u>Quality control department:</u></b>			
Quality control procedure for supplies & reagents			
Internal audit			
<b><u>Issuing department:</u></b>	Waiting area clean & ventilated		
	Emergency stock		
	Medical report required for issuing		
<b><u>Therapeutic unit department:</u></b>			
Blood transfusion for haemophilia & thalassemia patients			
<b><u>Storage</u></b>			
Blood storage refrigerators			
Recorded thermographs preserved with dates			
Safe transport the blood to outside hospital/ blood bank			
Reuse the returned bottle			
<b><u>Outdoor camps</u></b> Average number of camps held per month			
Proof sanitary conditions of camps			
<b><u>Infection control measures</u></b>			
Source for clean water for routine hand washing			
Soap for routine hand washing			
Use of bleaching solutions			
Use of personal protective barriers			
Bags for non medical waste collection			
Colored bags for medical waste collection			
Disposal of sharps in sharp containers			
Bio-medical waste pits set up/ functional			
Incinerator			
pre-employment vaccination with Hepatitis B vaccine			
Protocol for needle sticks injury

### Occupational Health Hazards of Nitrogenous Fertilizer Industry

**a. Collection of data:**

1. Site of the factory .....
2. Relation to the residential area.....
3. Departments, number of workers & their gender distribution:

Department	Number of workers in each department	Male	Female

4. Materials used in the factory:
    - Raw materials .....
    - Intermediate/ by- products .....
    - End products .....
    - Waste disposal methods .....
  5. Are there safety records?      [ ] YES      [ ] NO
  6. Are there medical records?      [ ] YES      [ ] NO
  7. Occupational health team in the factory: .....
- .....

**b. Observe the following:**

**1- The working environment for the following:**

- Gases & vapors      [ ] YES      [ ] NO
- Dust      [ ] YES      [ ] NO
- Abnormal odors      [ ] YES      [ ] NO
- Noise      [ ] YES      [ ] NO
- Adequacy of illumination      [ ] YES      [ ] NO
- High/ low temperature      [ ] YES      [ ] NO
- Environmental sanitation & cleanliness      [ ] YES      [ ] NO
- Washing facilities      [ ] YES      [ ] NO

**Tutor Signature**

**2- The workers practice:**

- Eating/ drinking/smoking while working [ ] YES [ ] NO
- Workers unsafe practice [ ] YES [ ] NO

**3- Workers compliance with personal protective equipment:**

- [ ] Hard hat [ ] Safety shoes
- [ ] Goggles [ ] Safety spectacles
- [ ] Hearing protectors [ ] Respiratory protection
- [ ] Overalls [ ] Gloves

**4- The safety measures:**

- Warning & labeling aids [ ] Present [ ] Absent
- Firefighting equipment [ ] Present [ ] Absent
- 1st aid boxes & emergency measures [ ] Present [ ] Absent

**c. Evaluate the possible health hazards**

- Environmental monitoring (hazard assessment):

Hazard	Monitoring method
Air borne chemicals	
Noise	
Ionizing radiation	
Vibration	
Heat stress	
Humidity	

- Accidents/ Injuries:

- Common Types of accidents occur among workers.....
- Number of accidents in the last 6 months .....
- Average number of days lost in the last 6 months .....

**d. Analysis of the results: At the end of your visit, what are the possible occupational health hazards in the workplace?**

- Physical .....
- Chemical .....
- 3. Mechanical .....
- 4. Psychological.....

### Water & Health (Water Purification Station)

According to your visit to the station, answer the following:

- The site of water intake is characterized by:  
.....  
.....  
.....  
.....  
.....
- The material used in coagulation is ..... in a dose of ..... in order to.....
- The type of filters used is .....
- The type of disinfectant used is ..... in a dose of.....
- What are the tests done for water before distribution?

.....  
.....  
.....  
.....

How often are these tests done?

.....  
.....  
.....  
.....

If the sample from potable water shows positive **coliform test**,

-It indicates .....

- The possible cause is .....

- The measures done for this water are

.....  
.....  
.....
