Head of the Department Vice Dean for research and postgraduate study

Aim of the Logbook.

To provide evidence that the candidate attained the desired level of competence required to gain the award. In this book, the candidate will document all academic and clinical skills he/she attained during their training.

Important regulations (for MS candidates):

- To be legible for the first part MS exam you have to attend at least 70% of the lectures of each course in the semester as evidenced by the logbook
- To be legible for the (MCQ online) exam at the end of each of second part semesters you have to attend at least 70% of the lectures of each course/module in the semester as evidenced by the logbook.
- To be legible for the final MS exam.
 - 1- A time interval of 36 months must pass since the day of registration to the job for residents and demonstrators and 30 months since the day of degree registration for non-residents.
 - 2- You have to spend a year of daily clinical/practical training in the department or two years with three times/week practical/clinical training.
 - 3-You have to register 4 semesters on Ibn lhaythm registration page.
 - 4- You have to attend 70% of the lectures of each course in the second part of MS degree.
 - 5- You have to fulfill and perform 70% of the practical skills documented in the logbook.

Bylaws of the MSc

I. The candidate should fulfill all required scientific activities specified in this Logbook. Logbook activities include the followings;

a) Theoretical courses (23 credit hrs): distributed as follow;

1. **First part** (in semesters 1 and 2) (lectures and practical classes): 8 credit hrs

2. **Second part** (in semesters 3 and 4) (lectures and practical classes): 15 credit hrs

b) Training program and Activities for 36 months: (in semesters 1-5): 10 credit hrs

- All details of hours and courses, training program and activities are mentioned in table in page 4.

- 75% of credit hrs is the minimum required before the candidate is allowed to submit for the final PhD examination.

II. The minimum requirement of each individual Logbook activity is shown as follow:

a) Attendance of seminars & journal clubs of others (at least 2 credit hrs)

b) Attendance of thesis discussion (at least 1 credit hr).

c) Attendance of conferences (at least 1 credit hr).

d) Attendance of the annual scientific conference of Mansoura Faculty of Medicine is a must.

e) Presentation of seminars (at least 2 credit hrs).

f) Presentation of journal clubs (at least 2 credit hrs).

g) Preparation of review or original articles or (at least 2 credit hrs).

Key: The credit hours are calculated as follow:

1) 1 hour **theoretical lecture** per week = 1 credit hour.

2) 2 hours **practical class** per week = 1 credit hour

درجة الماجستير في الفسيولوجيا الطبية

Medical Physiology

القسم المانح للدرجة : الفسيولوجيا الطبية (علم وظائف الأعضاء).

المقرارات الدراسية وتوزيع الساعات المعتمدة

| الساعات المعتمدة | | الكود | Course | المقرر | |
|------------------|--------|----------------------------------|---|---|----------------------|

Contents

First part (semester 1&2):

- Section I: Scientific lectures.
- Section II: practical skills

Second part .

- ✓ Section I: Scientific lectures.
- ✓ Section II: practical skills.
- ✓ Section III: Seminars.
- ✓ Section IV: Student teaching sections.
- ✓ Section V: scientific activities

(Conferences/workshops, Journal club, Attended thesis discussions, and Prepared review or original articles).

Final report.

Section I: Scientific lectures.

- **Name of the course: Cell and electrophysiology**

- **Compulsory**

- **First part**

Teaching hours: 45 Semester: (spring/fall/summer) year.....

| Date | Title of the lecture | Lecturer's signature |
|------|---|----------------------|
| | Organization of human body and body fluids | |
| | Homeostasis and feedback mechanisms | |
| | Functional organization of cell membrane and functions of cell membrane and its components | |
| | Intercellular connections and their functional organization | |
| | Transport through cell membrane (diffusion, active transport, osmosis and vesicular transport) | |
| | Resting membrane potential, action potential and graded potentials in excitable cells (neurons, skeletal, smooth and cardiac muscles) | |
| | Ion channels and membrane potentials and equilibrium potentials | |
| | Functions of cell organelles such as mitochondria, ribosomes, etc..... | |
| | DNA replication, transcription and translation | |
| | Organization of human body and body fluids | |

- **Name of the course: Internal Medicine**

- **Elective** - **First part**

Teaching hours: 75 Semester: (spring/fall/summer) year.....
