Clinical Human Research

Proposed Technique	Subjects & Materials of Research			
	Subject		Materials	
Invasive technique	Adult male		Cells & Tissues	
Non-Invasive technique	Adult female		Fetal Tissues	
Others	Child male		Biological Fluids	
	Child female		Others (specify)	

Ethical Guidelines to Conduct Research on Human participants

	ETHICAL CONSIDERATIONS	Yes	No	Non Applicable
1	The research is for the good of the society			
2	The research has potential benefit to the subject			
3	Informed consent of the human subject is taken			
4	The research is based on previous animal study			
5	The research will lead to unacceptable physical or mental suffering			
6	There is no risk of unacceptable disability			
7	The risks are balanced in relation to benefit			
8	Facilities for research are available			
9	The investigator is scientifically qualified for this research			
10	Privacy & confidentiality of participants are assured			
11	Inclusion of vulnerable subjects (old age , children, adolescents, mentally ill, prisoners in custody) is justified i.e. : consent provided			
12	Is there a relation between funding authority and research point : *If yes specify on a separate sheet.
