Educational Year: First Level Subject: Botany Final Examination in Botany Microbiology, First Term: Jan. 2015 Program: Course: Plant Systematic Chemistry Botany, Chemistry Zoology, Environmental Sciences, Biochemistry and Geology. Code: B 101 Time: 2 hours Date: 27/12/2014 **Question Mark:15** Full Mark: 60 الامتحان في صفحتين Answer the Following Questions: **Q1:** A. Complete the following sentences: 1) Sexual reproduction in basidiomycetes takes place by........ 2) Eumycota are classified into classes named......and......and...... 3) Ascocarps in ascomycetes are...... 4) Spores produced in the hosts of *Puccinia graminis* are......and..... 5) Nutrition in mycophyta is..... B. Write short notes with labeled diagrams on the following: 1) Ascus and ascospores formation in ascomycetes. 2) Types of sexual reproduction in fungi. Q2: A. Complete the missing word(s): (4 marks) 1- ......is the dominant generation in Funaria life cycle. 2- Gymnospermae reproduce by...... 3- In bryophytes, the root-like structure is known as...... 4- Staminate flower must lack...... B. Choose the most correct answer: (4 marks) 1) Which of the following is a non-vascular plants b- Cycas c- Adiantum d- Funaria a- Pinus 2) Double fertilization occurs in b- Angiosperms c- Ferns d-a+b a- Gymnosperms C. 1-Mention only two diagnostic characters of bryophytes, ferns and dicot plants.

marks)
Q3: A. In a table; list the major differences between the kingdoms of Whittaker's
classification of living organisms. (4 mark)
B. Define each of the following: (6 marks)
1- Gonidium 2- Carpogonium 3- Laminarin
4- Frustule 5- Air bladders 6- Colony
C. Explain Fucus life cycle with the help of labeled diagrams. (5 marks)
Q4: A. Choose the most correct answer(s): (8 marks)
1) The main feature of prokaryotic organisms is
A. Absence of locomotion
B. Absence of nuclear envelope
C. Absence of nuclear material D. Absence of protein synthesis
2) The process by which a virus embeds its DNA into the DNA of the host cell and is
replicated along with the host cell's DNA is known as:
A. Lytic infection
B. Lysogenic infection
C. Recombination
<ul><li>D. Binary fission</li><li>3) Bacteria named Staphylococcus would be:</li></ul>
A. Clustered and rod shaped
B. Chains and rod shaped
C. Clustered and sphere shaped
D. Chains and sphere shaped
4) What is the main purpose of flagella on a bacterial cell?
A. Digesting food B. Locomotion
C. Attaching to another cell
D. Reproduction
B. True or False (write (f) for true and (f) for false phrases) and correct the false one(s):
(7 marks)
1. Viruses are facultative saprophytes. ( )
2. Reproduction in bacteria takes place mainly by binary fission. ( )
3. Anabaena spiralis belongs to class Rhodophyceae.
4. Cell wall is equal in thickness in Gram positive and Gram negative ()
bacteria.
5. Bacteriophages infect fungal mycelia. ()  Evaminars: Prof. Dr. Wafaa Shokry Prof. Dr. Mohamed Ismail

Chemistry Department
Course: Chem. (121)

First Level Date: 20/1/2015

Time Allowed: 2 hours Full Mark: 60 Marks

	**** Answer <u>Only four</u> of the following questions ****	
[Q1]	Complete the following statements (10 Only):	15 marks)
1.	Heisenberg Uncertainty Principle states that	,
2.	The four quantum numbers of the last electron in 4d <sup>6</sup> are	
3.	The electronic configuration of an element with $(Z = 31)$ is, it is roomed ingroup and	period.
4.	The maximum number of electrons in the n shell is	
5.	The atomic size of F is than that of O and the atomic size of Na is than that of Li.	
6.	The elements in the same period have the same shell while that of the same group have the san	ne
7.	results from attraction between ions of different charges.	
	results from sharing of electrons.	
	Down the group, the first ionization energy and the electron affinity	
	In Lyman series of H spectrum, the third line represents the movement of electron from theet to the	nergy level
11.	s-s overlap produceand molecular orbitals.	
	80% of known elements on the earth are	
13.	The number of periods in the periodic table are and the elements are arranged in the order of	increasing
		,
	The % yield of chemical reaction equal	
15.	The electron configuration of iron atom $(Z = 26)$ is and there are unpaired electron	trons.
	Put the Mark ( $$ ) for the right sentence and (X) for the wrong with writing its correction (10 C	Only):
1. T	The maximum number of electrons in each of s, p, d and f-subshell is $(4\ell + 1)$ . (15 maximum)	irks)
2. B	F <sub>3</sub> is a liner molecule whereas BeCl <sub>2</sub> is an angular planar. ( <sub>5</sub> B, <sub>4</sub> Be, <sub>17</sub> Cl)	
3. Ir	the periodic table, the F element is the highest electronegative and Cs is the least. (6C, 7N, 8O, 9F)	
<b>4.</b> T	he size of Na is smaller than $Na^+$ (Atomic no. of $Na = 11$ ).	
5. T	he polarity of the covalent bond increases as follow: $C-O > C-N > C-F$ (6C, 7N, 8O, 9F)	
6. T	the first ionization energy of P atom is less than that of S atom. (15P, 16S)	
7. N	lo two electrons in one atom have different set of quantum numbers.	
8. T	The maximum number of electrons in $f$ subshell is 10.	
9. T	he atoms combined together to form moles.	
10.	The resonance structures should all have similar energies.	ed (d
11.	Bonding M.O. possess higher energy than of atomic orbitals.	
12.	The isoelectronic species have the same number of protons.	
13.	The % of elements in a compound depends on the amount of compound.	
14.	The Cl-P-Cl bond angles in PCl <sub>5</sub> are 90° and 120°. (15P, 17Cl)	
	The hybridization of N in $NH_3$ is $sp^2$ .	
[03]	Choose the correct answer for (10 Only) of the following questions:	(15 marks)
	Which sketch represents an orbital with the quantum numbers $n = 3$ , $\ell = 0$ , $m_{\ell} = 0$ ?	, , , , , , , , , , , , , , , , , , , ,
	SS 6) O 6) S 6) S	
	What is the maximum number of <u>d</u> orbitals that are possible for a given value of $n \geq 4$ ?	
	a) 1 b) 7 c) 5 d) 3	
	h of the following is most likely to be an ionic compound?	
a)	$NF_3$ b) $N_2$ c) $CO_2$ d) $Na_2O$	

3. Which of the following has the largest radius?  a) F  b) Cl  c) Br  d) 1  4. What is the electron configuration for magnesium ion. 12Mg²²?  a) 18² 28²2p² 6  b) 18² 28²2p² 5  c) b) 18² 28²2p² 5  c) b) N2  c) CO2  d) Na2O  6. Which of the following is an anometal?  a) NF3  b) N2  c) CO2  d) Na2O  6. Which one of the following is a nonmetal?  a) 13A1  b) 17C1  c) 20Ca  d) 18K  7. The electron configuration of copper atom (23Cu) is given by:  a) [Kr] 48³ 34³ b) [Kr] 48² 34² c) [Kr] 48³ 34⁴ q) [Kr] 48³ 34⁴ qp]  8. Which one of the following is the correct orbital diagram for ground state nitrogen (N)?  18		
4. What is the electron configuration for magnesium ion, 12Mg <sup>2+7</sup> ; a) 13 <sup>2</sup> 28 <sup>2</sup> 29 <sup>6</sup> b) 15 <sup>2</sup> 28 <sup>2</sup> 29 <sup>6</sup> 38 <sup>2</sup> c) 15 <sup>2</sup> 28 <sup>2</sup> 29 <sup>6</sup> 38 <sup>2</sup> 3p <sup>2</sup> d) 18 <sup>2</sup> 28 <sup>2</sup> 29 <sup>6</sup> 38 <sup>2</sup> 2. Which of the following is most likely to be an ionic compound? a) NF <sub>3</sub> b) N <sub>2</sub> c) CO <sub>2</sub> d) Na <sub>2</sub> O 6. Which one of the following is a nonmetal? a) pAI above the following is a nonmetal? 7. The electron configuration of copper atom (20Cu) is given by: a) (Kr) 48 <sup>2</sup> 30 <sup>40</sup> b) (Kr) 48 <sup>2</sup> 30 <sup>40</sup> c) (Kr) 48 <sup>2</sup> 30 <sup>40</sup> p) d) (Kr) 48 <sup>2</sup> 30 <sup>40</sup> a) 8. Which one of the following is the correct orbital diagram for ground state nitrogen (7N)?  **B. Which one of the following is the correct orbital diagram for ground state nitrogen (7N)?  **B. Which of the following elements has the largest atomic radius? a) 7N b) 4O c) 5B d) 6C  10. Which of the following elements has the largest atomic radius? a) 7N b) 4O c) 5B d) 6C  11. In which orbital below would an electron be closest to the nucleus? a) 48 b) 5d c) 2p d) 2s  12. Which of the following Lewis N <sub>2</sub> O structures is false? a) 1 N EN-G b) NEN-G c) 1 N-N-B c  13. How many equivalent resonance forms can be drawn for NO;? a) 1 b) 2 c) 3 d) There are no resonance structures for this ion.  14. The number of unpaired electrons in 27Co is a) 3 b) 4 c) 4 d) 6  15. Which one of the following molecular formulas is an empirical formula? a) Callo(3p) H <sub>2</sub> O <sub>2</sub> c) C <sub>2</sub> H <sub>4</sub> SO d) H <sub>2</sub> P <sub>2</sub> O <sub>6</sub> e) None of the above. 16. The limiting reagent in a chemical reaction is one that: a) has the largest molar mass (formula weight). b) has the smallest molar mass (formula weight). c) has the smallest coefficient. 17. The % yield of chemical reaction equal a) Theoretical yield/ Actual yield b) Theoretical yield + Actual yield c) Actual yield/ Theoretical yield  [Q4] a) If 16 grams of O <sub>2</sub> react with excess C <sub>2</sub> H <sub>6</sub> , how many grams of CO <sub>2</sub> will be formed? The formula mass of O <sub>2</sub> = 32 am and the formula mass of CO <sub>2</sub> = 44 amu. Balance the equation: C <sub>2</sub> H <sub>4</sub> (g) + O <sub>2</sub> (g) + O <sub>2</sub> (g) + O <sub>2</sub> (g) + H <sub>2</sub> O(g) (S marks) b) How much water must be added		
a) 18² 28² 29² b) 18² 28² 29² 53² c) 18² 28² 29² 33² 39² d) 18² 28² 29² 38²  2. Which of the following is most likely to be an ionic compound? a) NP3 b) N2 c) CO2 d) Na2O  6. Which one of the following is a nonmetal? a) 13Al b) 17Cl c) 20Ca d) 19K  7. The electron configuration of copper atom (20Cu) is given by: a) [Kr] 48² 3d¹ b) [Kr] 48² 3d² c) [Kr] 48³ 3d² 4p¹ d) [Kr] 48² 3d¹ 4p¹  8. Which one of the following is the correct orbital diagram for ground state nitrogen (7N)?  8. Which of the following elements has the largest atomic radius?  9. Which of the following elements has the largest atomic radius? a) 7N b) 8O c) 8B d) 6C  10. Which of the following elements has the most negative electron affinity? a) 1NN b) 8O c) 6D d) 6C  11. In which orbital below would an electron be closest to the nucleus? a) 1N b) 5O d) d) 6C  12. Which of the following Lewis NyO structures is false? a) 1 NEN-G: b) N=N=C c) 1N-N=O: 13. How many equivalent resonance forms can be drawn for NO2? a) 1 b) 2 c) 3 d) There are no resonance structures for this ion. 14. The number of unpaired electrons in 27Co is a) 3 b) 4 c) 4  15. Which one of the following molecular formulas is an empirical formula? a) Cp(Al(A)D) H <sub>2</sub> O <sub>2</sub> c) C <sub>2</sub> H <sub>4</sub> SO d) H <sub>2</sub> P <sub>4</sub> O <sub>5</sub> e) None of the above. 16. The limiting reagent in a chemical reaction is one that: a) has the largest molar mass (formula weight). c) has the smallest coefficient. d) is consumed completely. 17. The % yield of chemical reaction equal a) Theoretical yield Actual yield b) Theoretical yield + Actual yield c) Actual yield/ Theoretical yield (C4) a) If 16 grams of O <sub>2</sub> react with excess Cp(H <sub>6</sub> ), how many grams of CO <sub>2</sub> will be formed? The formula mass of O <sub>2</sub> = 32 amu and the formula mass of CO <sub>2</sub> = 44 amu. Balance the equation: C2H <sub>6</sub> (g) + O <sub>2</sub> (g) → CO <sub>2</sub> (g) + H <sub>2</sub> O(g)  17. The Weigled of chemical reaction equal a) Theoretical yield/ Actual yield b) Theoretical yield end of the following: (3 marks) b) How much water must be added to 25.0 cm² of 0.5 M KOH solution to produce a solution whose c		
a) NF3 b) N <sub>2</sub> c) CO <sub>2</sub> d) Na <sub>3</sub> O 6, Which one of the following is a nonmetal? a) 1 <sub>3</sub> Al b) 1 <sub>7</sub> Cl c) 2 <sub>10</sub> Ca d) 1 <sub>9</sub> K 7. The electron configuration of copper atom (2 <sub>9</sub> Cu) is given by: a) [Kr] 4s² 3d³ b) [Kr] 4s² 3d³ c) [Kr] 4s³ 3d³ d) d) [Kr] 4s² 3d¹ 4p¹ 8. Which one of the following is the correct orbital diagram for ground state nitrogen (7N)?  s¹ 5² 28² 2p² 1 5² 2² 2p² 1 5² 28² 2p² 1 5² 2p² 2p² 2p² 2p² 2p² 2p² 2p² 2p² 2p² 2p	a) $1s^2 2s^2 2p^6$ b) $1s^2 2s^2 2p^6 3s^1$ c) $1s^2 2s^2 2p^6 3s^2 3p^2$ d) $1s^2 2s^2 2p^6 3s^2$	
6. Which one of the following is a nonmetal?  a) $j_1AI$ b) $j_1CI$ c) $j_2Ca$ d) $j_3AI$ 7. The electron configuration of copper atom $(s_2Cu)$ is given by:  a) $[Kr] 4s^2 3d^{10}$ b) $[Kr] 4s^2 3d^{3}$ c) $[Kr] 4s^3 3d^{3} 4p^{1}$ 8. Which one of the following is the correct orbital diagram for ground state nitrogen $(\gamma N)$ ?  8. Which one of the following is the correct orbital diagram for ground state nitrogen $(\gamma N)$ ?  8. Which of the following elements has the largest atomic radius?  a) $j_1AI$ 9. Which of the following elements has the largest atomic radius?  a) $j_1AI$ 9. Which of the following elements has the most negative electron affinity?  a) $j_1AI$ 11. In which orbital below would an electron be closest to the nucleus?  a) $j_1AI$ 12. Which of the following Lewis $N_2O$ structures is false?  a) $j_1AI$ 13. How many equivalent resonance forms can be drawn for $NO^2$ ?  a) $j_1AI$ 14. The number of unpaired electrons in $j_2CO$ is $j_1AI$ 15. Which one of the following molecular formulas is an empirical formula?  a) $C_2H_0O_2D$ 16. The limiting reagent in a chemical reaction is one that:  a) has the largest molar mass (formula weight).  b) has the largest molar mass (formula weight).  c) has the smallest coefficient.  b) has the largest molar mass (formula weight).  c) has the smallest coefficient.  c) $C_1H_0O_2D$ c) $C_2O_2D$ 17. The % yield of chemical reaction equal  a) Theoretical yield/ Actual yield  b) Theoretical yield/ Actual yield  b) How much water must be added to 25.0 cm³ of 0.5 M KOH solution to produce a solution whose concentration is 0.350 M?  c) The Pauli Exclusion Principles states that		
7. The electron configuration of copper atom (20/Cu) is given by:  a) [Kr] 4s² 3d¹ b) [Kr] 4s² 3d² c) [Kr] 4s³ 3d² 4p¹ d) [Kr] 4s² 3d¹ 4p¹  8. Which one of the following is the correct orbital diagram for ground state nitrogen (5N)?  20 152 27 20 153 25 20 153 20 15		
a) [Kr] 4s² 3d¹ b) [Kr] 4s² 3d² c) [Kr] 4s² 3d² q) d) [Kr] 4s² 3d¹ 4p¹ d) [Kr] 4s² 3d¹ 4p² d) [Kr] 4s²	a) $_{13}Al$ b) $_{17}Cl$ c) $_{20}Ca$ d) $_{19}K$	
18   22   20   18   24   14   1   1   15   25   20   15   25   20   15   25   20   15   15   15   15   15   15   15   1	7. The electron configuration of copper atom (29Cu) is given by: a) [Kr] 4s <sup>1</sup> 3d <sup>10</sup> b) [Kr] 4s <sup>2</sup> 3d <sup>9</sup> c) [Kr] 4s <sup>1</sup> 3d <sup>9</sup> 4p <sup>1</sup> d) [Kr] 4s <sup>2</sup> 3d <sup>10</sup> 4p <sup>1</sup>	
9. Which of the following elements has the largest atomic radius?  a) 7N  b) 8O  c) 8B  d) 6C  10. Which of the following elements has the most negative electron affinity?  a) 10N  c) 8O  d) 6C  11. In which of the following elements has the most negative electron affinity?  a) 10N  b) 9F  c) 8O  d) 6C  11. In which or that below would an electron be closest to the nucleus?  a) 4s  b) 5d  c) 2p  d) 2s  12. Which of the following Lewis N <sub>2</sub> O structures is false?  a): NEN-Ö:  b) ½=N=Ö  c): N-N=O:  13. How many equivalent resonance forms can be drawn for NO2?  a) 1  b) 2  c) 3  d) There are no resonance structures for this ion.  14. The number of unpaired electrons in 27Co is  a) 3  b) 4  c) 4  d) 6  15. Which one of the following molecular formulas is an empirical formula?  a) C <sub>2</sub> H <sub>2</sub> O <sub>2</sub> D) H <sub>2</sub> O <sub>2</sub> c) C <sub>2</sub> H <sub>6</sub> SO  d) H <sub>3</sub> P <sub>4</sub> O <sub>6</sub> e) None of the above.  16. The limiting reagent in a chemical reaction is one that:  a) has the largest molar mass (formula weight).  c) has the smallest coefficient.  d) is consumed completely.  17. The % yield of chemical reaction equal  a) Theoretical yield A Catual yield  b) Thoeretical yield A Catual yield  c) Actual yield Theoretical yield  Q1 a) If 16 grams of O <sub>2</sub> react with excess C <sub>2</sub> H <sub>6</sub> , how many grams of CO <sub>2</sub> will be formed? The formula mass of CO <sub>2</sub> = 32 amu and the formula mass of CO <sub>2</sub> = 44 amu. Balance the equation:  C <sub>2</sub> H <sub>6</sub> (g) + O <sub>2</sub> (g) → CO <sub>2</sub> (g) + H <sub>2</sub> O(g)  b) How much water must be added to 25.0 cm³ of 0.5 M KOH solution to produce a solution whose concentration is 0.350 M?  (5 marks)  b) Draw Lewis structure of two only and calculate the formal charge of the following molecules:  ii. Hund's rule states that  iii. Hund's rule the electronic configuration and deduce the 4 Q. No. of the last electro		
a) $_7N$ b) $_8O$ c) $_5B$ d) $_6C$ 10. Which of the following elements has the most negative electron affinity?  a) $_{10}Ne$ b) $_9F$ c) $_8O$ d) $_6C$ 11. In which orbital below would an electron be closest to the nucleus?  a) $_4S$ b) $_5D$ c) $_5D$ d) $_6C$ 12. Which of the following Lewis N <sub>2</sub> O structures is false?  a) $_4N$ N=N= $_6D$ ; b) $_5N$ =N= $_6D$ c) $_5N$ -N= $_6D$ ;  13. How many equivalent resonance forms can be drawn for NO2?  a) 1 b) 2 c) 3 d) There are no resonance structures for this ion.  14. The number of unpaired electrons in $_{27}Co$ is  a) 3 b) 4 c) 4 d) 6  15. Which one of the following molecular formulas is an empirical formula?  a) $_6D$ -Q <sub>6D</sub> H <sub>6</sub> O <sub>2</sub> c) $_6D$ -Q <sub>7D</sub>		,
a) 10Ne b) 9F c) 8O d) 6C  11. In which orbital below would an electron be closest to the nucleus? a) 4s b) 5d c) 2p d) 2s  12. Which of the following Lewis N₂O structures is false? a): N≣N-Ö: b) N=N=Ö c): N-N≡O:  13. How many equivalent resonance forms can be drawn for NO:? a) 1 b) 2 c) 3 d) There are no resonance structures for this ion.  14. The number of unpaired electrons in ₂₂Co is a) 3 b) 4 c) 4 d) 6  15. Which one of the following molecular formulas is an empirical formula? a) C₀H₀O₂b) H₂O₂ c) C₂H₀SO d) H₂P₄O₀ e) None of the above.  16. The limiting reagent in a chemical reaction is one that: a) has the largest molar mass (formula weight). c) has the smallest coefficient. d) is consumed completely.  17. The % yield of chemical reaction equal a) Theoretical yield/ Actual yield b) Theoretical yield + Actual yield c) Actual yield/ Theoretical yield  [Q4] a) If 16 grams of O₂ react with excess C₂H₀, how many grams of CO₂ will be formed? The formula mass of O₂ = 32 amu and the formula mass of CO₂ = 44 amu. Balance the equation: C₂H₀(g) + O₂(g) → CO₂(g) + H₂O(g) (5 marks) b) How much water must be added to 25.0 cm² of 0.5 M KOH solution to produce a solution whose concentration is 0.350 M?  (5 marks)  [Q5] A. Complete the following: i. The Pauli Exclusion Principle states that		
11. In which orbital below would an electron be closest to the nucleus?  a) 4s b) 5d c) 2p d) 2s  12. Which of the following Lewis N₂O structures is false?  a) : N≡N-Ö: b) Ñ≡N=Ö c) : Ñ-N≡O:  13. How many equivalent resonance forms can be drawn for NO₂?  a) 1 b) 2 c) 3 d) There are no resonance structures for this ion.  14. The number of unpaired electrons in ₂₂Co is  a) 3 b) 4 c) 4 d) 6  15. Which one of the following molecular formulas is an empirical formula?  a) C₀H₀O₂b) H₂O₂ c) C₂H₀SO d) H₂P₄O₀ e) None of the above.  16. The limiting reagent in a chemical reaction is one that:  a) has the largest molar mass (formula weight). b) has the smallest molar mass (formula weight). c) has the smallest coefficient. d) is consumed completely.  17. The % yield of chemical reaction equal  a) Theoretical yield / Actual yield b) Theoretical yield + Actual yield c) Actual yield / Theoretical yield  [Q4] a) If 16 grams of O₂ react with excess C₂H₀, how many grams of CO₂ will be formed? The formula mass of O₂ = 32 amu and the formula mass of CO₂ = 44 amu. Balance the equation:  C₂H₆(g) + O₂(g) → CO₂(g) + H₂O(g) (5 marks)  b) How much water must be added to 25.0 cm² of 0.5 M KOH solution to produce a solution whose concentration is 0.350 M?  c) Draw Born-Haber cycle of NaCl? (5 marks)  [Q5] A. Complete the following: (5 marks)  ii. Hund's rule states that		/ */
12. Which of the following Lewis N2O structures is false?  a): NEN-Ö: b) NENEÖ c): NENEO:  13. How many equivalent resonance forms can be drawn for NO2'?  a) 1 b) 2 c) 3 d) There are no resonance structures for this ion.  14. The number of unpaired electrons in 27Co is  a) 3 b) 4 c) 4 d) 6  15. Which one of the following molecular formulas is an empirical formula?  a) C <sub>6</sub> H <sub>6</sub> O <sub>2</sub> b) H <sub>2</sub> O <sub>2</sub> c) C <sub>2</sub> H <sub>6</sub> SO d) H <sub>2</sub> P <sub>4</sub> O <sub>6</sub> c) None of the above.  16. The limiting reagent in a chemical reaction is one that: a) has the largest molar mass (formula weight). b) has the smallest coefficient. d) is consumed completely.  17. The % yield of chemical reaction equal a) Theoretical yield/ Actual yield b) Theoretical yield + Actual yield c) Actual yield/ Theoretical yield [Q4] a) If 16 grams of O <sub>2</sub> react with excess C <sub>2</sub> H <sub>6</sub> , how many grams of CO <sub>2</sub> will be formed? The formula mass of O <sub>2</sub> = 32 amu and the formula mass of CO <sub>2</sub> = 44 amu. Balance the equation: C <sub>2</sub> H <sub>6</sub> (g) + O <sub>2</sub> (g) → CO <sub>2</sub> (g) + H <sub>2</sub> O (g) (5 marks) b) How much water must be added to 25.0 cm <sup>3</sup> of 0.5 M KOH solution to produce a solution whose concentration is 0.350 M? (5 marks) c) Draw Born-Haber cycle of NaCl? (5 marks) ii. Hund's rule states that	11. In which orbital below would an electron be closest to the nucleus?	
a): N≣N-Ö: b) Ñ=N=Ö c): Ñ-N≡O:  13. How many equivalent resonance forms can be drawn for NO₂?  a) 1 b) 2 c) 3 d) There are no resonance structures for this ion.  14. The number of unpaired electrons in ½, Co is a) 3 b) 4 c) 4 d) 6  15. Which one of the following molecular formulas is an empirical formula? a) C₀H₀O₂b) H₂O₂ c) C₂H₀SO d) H₂P₄O₀ e) None of the above.  16. The limiting reagent in a chemical reaction is one that: a) has the largest molar mass (formula weight). b) has the smallest molar mass (formula weight). c) has the smallest coefficient. d) is consumed completely.  17. The % yield of chemical reaction equal a) Theoretical yield/ Actual yield b) Theoretical yield + Actual yield c) Actual yield/ Theoretical yield  [Q4] a) If 16 grams of O₂ react with excess C₂H₀, how many grams of CO₂ will be formed? The formula mass of O₂ = 32 amu and the formula mass of CO₂ = 44 amu. Balance the equation: C₂H₆(g) + O₂(g) → CO₂(g) + H₂O(g) (5 marks) b) How much water must be added to 25.0 cm³ of 0.5 M KOH solution to produce a solution whose concentration is 0.350 M? (5 marks) c) Draw Born-Haber cycle of NaCl? (5 marks)  [Q5] A. Complete the following: ii. Hund's rule states that		
13. How many equivalent resonance forms can be drawn for NO2?  a) 1 b) 2 c) 3 d) There are no resonance structures for this ion.  14. The number of unpaired electrons in ${}_{27}\text{Co}$ is a) 3 b) 4 c) 4 d) 6  15. Which one of the following molecular formulas is an empirical formula? a) ${}_{C_6}\text{H}_{O2}\text{D}$ H <sub>2</sub> O <sub>2</sub> c) ${}_{C_2}\text{H}_6\text{SO}$ d) ${}_{H_2}\text{P}_4\text{O}_6$ e) None of the above.  16. The limiting reagent in a chemical reaction is one that: a) has the largest molar mass (formula weight). c) has the smallest coefficient. d) is consumed completely.  17. The % yield of chemical reaction equal a) Theoretical yield/ Actual yield b) Theoretical yield + Actual yield c) Actual yield/ Theoretical yield Q1 a) If 16 grams of ${}_{O_2}$ react with excess ${}_{C_2}\text{H}_6$ , how many grams of ${}_{C_2}\text{V}$ will be formed? The formula mass of ${}_{O_2}$ = 32 amu and the formula mass of ${}_{C_2}$ = 44 amu. Balance the equation: ${}_{C_2}\text{H}_6$ (g) + ${}_{C_2}$ (g) $\rightarrow$ ${}_{C_2}$ (g) + ${}_{H_2}$ O (g) (5 marks) b) How much water must be added to 25.0 cm <sup>3</sup> of 0.5 M KOH solution to produce a solution whose concentration is 0.350 M? (5 marks) c) Draw Born-Haber cycle of NaCl? (5 marks) i) HNO <sub>3</sub> ii) SO <sub>2</sub> iii) POCl <sub>3</sub> (1H, ${}_{7}\text{N}$ , ${}_{8}\text{O}$ , ${}_{15}\text{P}$ , ${}_{16}\text{S}$ , ${}_{17}\text{Cl}$ ) C. Write the electronic configuration and deduce the 4 Q. No. of the last electron in the following: i) Na ii) Fe <sup>3+</sup> (1)Na, ${}_{26}\text{Fe}$ ) D. Calculate the wavelength of the radiation that has energy of 3.6 x ${}_{10}$ ${}_{17}$ joules. (3 marks) (C = 3 x ${}_{10}^{8}$ m/s. Planl's constant (h) = 6.6 x ${}_{10}^{34}$ J.s)		
a) 1 b) 2 c) 3 d) There are no resonance structures for this ion.  14. The number of unpaired electrons in 27Co is a) 3 b) 4 c) 4 d) 6  15. Which one of the following molecular formulas is an empirical formula? a) C <sub>6</sub> H <sub>6</sub> O <sub>2</sub> b) H <sub>2</sub> O <sub>2</sub> c) C <sub>2</sub> H <sub>6</sub> SO d) H <sub>2</sub> P <sub>4</sub> O <sub>6</sub> e) None of the above.  16. The limiting reagent in a chemical reaction is one that: a) has the largest molar mass (formula weight). c) has the smallest coefficient. d) is consumed completely.  17. The % yield of chemical reaction equal a) Theoretical yield/ Actual yield b) Theoretical yield + Actual yield c) Actual yield/ Theoretical yield a) Theoretical yield/ Actual yield b) Theoretical yield + Actual yield c) Actual yield/ Theoretical yield  19. Theoretical yield b) Theoretical yield ham ass of CO <sub>2</sub> = 32 amu and the formula mass of CO <sub>2</sub> = 44 amu. Balance the equation:  10. C <sub>2</sub> H <sub>6</sub> (g) + O <sub>2</sub> (g) → CO <sub>2</sub> (g) + H <sub>2</sub> O(g)  21. The much water must be added to 25.0 cm <sup>3</sup> of 0.5 M KOH solution to produce a solution whose concentration is 0.350 M?  22. The pauli Exclusion Principle states that		
14. The number of unpaired electrons in \$27\$Co is a) \$3		for this ion.
15. Which one of the following molecular formulas is an empirical formula?  a) $C_6H_6O_2b$ ) $H_2O_2$ c) $C_2H_6SO$ d) $H_2P_4O_6$ e) None of the above.  16. The limiting reagent in a chemical reaction is one that: a) has the largest molar mass (formula weight). c) has the smallest coefficient. d) is consumed completely.  17. The % yield of chemical reaction equal a) Theoretical yield/ Actual yield b) Theoretical yield + Actual yield c) Actual yield/ Theoretical yield [Q4] a) If 16 grams of $O_2$ react with excess $C_2H_6$ , how many grams of $CO_2$ will be formed? The formula mass of $O_2 = 32$ amu and the formula mass of $CO_2 = 44$ amu. Balance the equation: $C_2H_6$ (g) + $O_2$ (g) $\rightarrow CO_2$ (g) + $H_2O$ (g)  b) How much water must be added to 25.0 cm³ of 0.5 M KOH solution to produce a solution whose concentration is 0.350 M?  c) Draw Born-Haber cycle of NaCl?  [Q5] A. Complete the following: i. The Pauli Exclusion Principle states that ii. Hund's rule states that  B. Draw Lewis structure of two only and calculate the formal charge of the following molecules: i) HNO3 ii) SO2 iii) POCl3 (1H, 7N, 8O, 15P, 16S, 17Cl)  C. Write the electronic configuration and deduce the 4 Q. No. of the last electron in the following: (3 Marks) i) Na ii) Fe³+ (11Na, 26Fe)  D. Calculate the wavelength of the radiation that has energy of 3.6 x 10 <sup>-17</sup> joules. (3 Marks) (C = 3 x 10 <sup>8</sup> m/s. Planl's constant (h) = 6.6 x 10 <sup>-34</sup> J.s)	14. The number of unpaired electrons in 27Co is	
a) $C_6H_6O_2b)$ $H_2O_2$ c) $C_2H_6SO$ d) $H_2P_4O_6$ e) None of the above.  16. The limiting reagent in a chemical reaction is one that: a) has the largest molar mass (formula weight). c) has the smallest coefficient. d) is consumed completely.  17. The % yield of chemical reaction equal a) Theoretical yield / Actual yield b) Theoretical yield + Actual yield c) Actual yield/ Theoretical yield [Q4] a) If 16 grams of $O_2$ react with excess $C_2H_6$ , how many grams of $CO_2$ will be formed? The formula mass of $O_2 = 32$ amu and the formula mass of $CO_2 = 44$ amu. Balance the equation: $C_2H_6(g) + O_2(g) \rightarrow CO_2(g) + H_2O(g)$ (5 marks) b) How much water must be added to 25.0 cm³ of 0.5 M KOH solution to produce a solution whose concentration is 0.350 M? (5 marks) c) Draw Born-Haber cycle of NaCl?  [Q5] A. Complete the following: (5 marks) i. The Pauli Exclusion Principle states that ii. Hund's rule states that iii. Honor iii) SO <sub>2</sub> iii) POCl <sub>3</sub> ( $H_1$ , $H_2$ , $H_3$ , $H_4$ , $H_4$ , $H_4$ , $H_5$ , $H_4$ , $H_4$ , $H_4$ , $H_5$ , $H_5$ , $H_6$ , $H_7$ , $H_8$ ,		
16. The limiting reagent in a chemical reaction is one that: a) has the largest molar mass (formula weight). b) has the smallest molar mass (formula weight). c) has the smallest coefficient. d) is consumed completely.  17. The % yield of chemical reaction equal a) Theoretical yield/ Actual yield b) Theoretical yield + Actual yield c) Actual yield/ Theoretical yield  [Q4] a) If 16 grams of O₂ react with excess C₂H₀, how many grams of CO₂ will be formed? The formula mass of O₂ = 32 amu and the formula mass of CO₂ = 44 amu. Balance the equation: C₂H₀ (g) + O₂ (g) → CO₂ (g) + H₂O (g) (5 marks) b) How much water must be added to 25.0 cm³ of 0.5 M KOH solution to produce a solution whose concentration is 0.350 M? (5 marks) c) Draw Born-Haber cycle of NaCl? (5 marks)  [Q5] A. Complete the following: (5 marks) i. The Pauli Exclusion Principle states that		above
a) has the largest molar mass (formula weight). c) has the smallest coefficient. d) is consumed completely.  17. Mansoura University Faculty of Science Department of Physics

#### First Term Exam 2014-2015 Physics (101)

Time Allowed: 2 h Date: 13/1/2015 All Programs

Answer the following Questions:
Q.1) Choose and write the correct answers: (10 Marks)
1- A and B are two wires. The radius of A is twice that of B. They are stretched by the some load.
Then the stress on B is.
Equal to that on A - Two times that on A - Four times that on A - Half that on A
2- The amount of radiation emitted by a perfectly black body is proportional to.
Temperature on ideal gas scale - Fourth power of temperature on ideal gas scale
Source of temperature on ideal gas scale - Fourth root of temperature on ideal gas scale
3- If the temperature increases, the modulus of elasticity
Increases - Decreases - Remains constant - Becomes zero
increases - Decreases - Remains constant - Decomes zero
4- Construction of submarines is based on.
Archimedes' principle - Pascal's law - Newton's laws - Bernoulli's theorem
5- If the force F equal $F = 2\pi r L v \eta / R$ where r is radius L is length, v is speed and R is distance,
What are the dimensions of $\eta$ (viscosity)? $M L^{-2} T^{-1}$ - $M L^{-1} T^{-2}$ - $M^{-1} L^{-1} T^{-1}$ - $M L^{-1} T^{-1}$
6- A body executes simple harmonic motion. The potential energy (P.E.), the kinetic energy (K.E.) and
total energy (T.E.) are measured as a function of displacement x. Which of the following statements is
true.
P.E. is maximum when $x = 0$ - T.E. is zero when $x = 0$
K.E. is maximum when $x = 0$ - K.E. is maximum when x is maximum
7- Water flows through a pipe, the diameter of the pipe at point B is larger than at point A. Then the
speed of the water greater at.
Point A - cannot be determined - Point B - Same at both a and B
8- Shear modulus is given by
$S = (F/V)/(\cos \theta) - S = (F/A)/(\Delta V/V) - S = (F/A)/(\theta) - S = (A/F)/(\tan \theta)$
9- In simple harmonic motion the acceleration of the oscillating particle is given by
$a = -\omega^2 A \sin(\omega t + \delta) - a = A \cos(\omega t + \delta) - a = -\omega A \sin(\omega t + \delta) - a = -\omega^2 A^2 \sin(\omega t + \delta)$
10- The latent heat of vaporization of a substance is always.
Greater than its latent heat of fusion - Equal to its latent heat of condensation
Greater than its latent heat of condensation - Less than its latent heat of fusion
Q 2- What is the meaning of each expression: (20 Marks)
1) If the material restore to its original shape and size after removing the load from it, it's said to be
2) If the material does not return to its original dimensions after removing the applied stress, it
said to be
3) If a body is totally or partially immersed in a fluid, the buoyant force will equal to the weight o
displaced fluid

	<ul><li>4) Is the constant of each matter and equal ratio between stress and strain.</li><li>5) It is the motion of a fluid in which every particle in the fluid follows the same path as the previous particle.</li></ul>						
	6) The rate of heat flow per unit area per unit temperature gradient when the heat flow is at right angle to the faces of a thin parallel material under steady state condition						
	*********	•••••					
7) Suppose a rod of material has a length $L_0$ at some initial temperature $T_0$ when the temperature changes by $\Delta T$ , the length changes by $\Delta L$ .

الزمن: ساعتين التاريخ: ۱۷ / ۱/۲۰۱۵ الدرجة الكلية: ٨٠ درجة

كلية العلوم - قسم الرياضيات

المستوى: الأول

المادة : جبر وهندسة

كود المادة: ر١١١

## أجب عن جزئين فقط من كل سؤال من الأسئلة الآتية في ضوء ما درست (الجزء ١٠ درجات):-

السوال الأول: - (۲۰ درجة) أ- أثبت باستخدام مبدأ الاستنتاج الرياضي أن لكل عدد طبيعي n

 $1^{2} + 2^{2} + 3^{2} + \dots + n^{2} = \frac{n}{2}(n+1)(2n+1)$ 

 $Z^{4/3}$  ب- ضع العدد  $Z = \frac{1}{(2+i)^2} - \frac{1}{(2-i)^2}$  على الصورة المثلثية ثم أوجد

ج- إذا كانت  $\frac{3x+5}{2x-3}$  أثبت أن f(x) دالة أحادية ثم أوجد معكوسها.

السؤال الثاني: - (۲۰ درجة)

أ- باستخدام طريقة كرامر أوجد حل مجموعة المعادلات التالية:

.x + 3y - 2z = 0, 2x - y + 4z = 6, 2x + 2y + 3z = 5

ب- عرف علاقة التكافؤ على مجموعة A. وإذا كانت R علاقة معرفة على مجموعة الأعداد الصحيحة في الصورة  $\{(z,x):x,y\in Z,x+y=1\}$  فأثبت أن  $R=\{(x,y):x,y\in Z,x+y=1\}$ فصول التكافؤ.

ج- حلل الكسر  $\frac{2x+1}{(x-2)^2(x^2+1)}$  إلى كسوره الجزئية.

السوال الثالث: - (٢٠ درجة)

أ- عين احداثيات المركز والبؤرتين والاختلاف المركزي وطول الوتر البؤري العمودي وطولي المحورين ومعادلات المحورين والدليلين والخطين التقاربين للقطع

. أم ارسمه  $16x^2 - 9y^2 + 64x + 18y = 89$ 

ب-ار سم القطع الذي تمثله المعادلة  $y^2 + 8x - 6y + 17 = 0$  مع ذكر البيانات الخاصة به. ج- أوجد معادلة الخط المستقيم المار بنقطة تقاطع المستقيمين

3x + 3y - 8 = 0 والعمودي على الخط المستقيم 2x - y - 1 = 0,3 + 2y - 12 = 0

## السؤال الرابع: - (۲۰ درجة)

أ- أو جد المعادلة الجديدة للمنحنى y = 2 - 6x - 10y - 2 = 0 بعد نقل المحاور موازية .0'(3,5) لنفسها إلى النقطة

ب- أوجد معادلة القطع المكافئ الذي بؤرته هي (0,6) ودليله هو الخط المستقيم y=-3 وأوجد معادلة المحور وطول الوتر البؤرى العمودى ثم أرسم القطع.

ج-ارسم القطع  $9x^2 + 25y^2 - 18x + 100y = 116$  مع ذكر البيانات الخاصة به.

مع أطيب التمنيات بالتوفيق أسرة قسم الرياضيات

#### **English Language Exam**

#### Section One: Reading skills:

Read the passage below in order to answer the questions which follow:

- (1) Pollution has been defined as the addition of any substance or form of energy to the environment at a rate faster than the environment can accommodate its dispersion, breakdown, recycling or storage in some harmless form. In simpler terms, pollution means the poisoning of the environment by man.
- (2) Pollution has accompanied mankind ever since groups of people settled down in one place for a long time. It was not a serious problem during primitive times when there was more than ample space available for each individual or group. As the human population boomed, pollution became a major problem and has remained as one ever since. Cities of ancient times were often unhealthy places, fouled by human wastes and debris. Such unsanitary conditions favored the outbreak of diseases that killed or maimed many people living in those times.
- (3) The rapid advancement of technology and industrialization today is something that man can be proud of. However, <u>it</u> has brought along with it many undesirable results, one of which is the pollution of our environment. Humanity today is threatened by the dangers of air, water, land and noise pollution.
- (4) The air that we breathe is heavily polluted with toxic gases, chemicals and dust. <u>These</u> consist of the discharge from industrial factories and motor vehicles. The emission of lead and carbon monoxide from exhaust fumes is a major cause for concern too. Outdoor burning of trash and forest fires have also contributed to air pollution. <u>They</u> cause the smarting of the eyes, bouts and coughing and respiratory problems. Owing to the burning of fossil fuels, the level of carbon monoxide in the air is more than desirable. Too high a level of carbon dioxide will cause the Earth's temperature to rise. The heat will melt the polar caps, thus raising the sea level and causing massive floods around the world. The burning of fuels also produces gases which form acid rain. Acid rain has a damaging effect on water, forest and soil, and is harmful to our health.
- (5) Man has reached the moon and invented supersonic crafts that can travel faster than the speed of sound. However, these inventions emit pollutants which contribute to the depletion of the ozone layer. This depletion of ozone, which absorbs the harmful rays of the sun and prevents them from reaching the Earth, will have drastic effects on all living things. It will lead to a rise in the number of people suffering from skin cancer.
- (6) Water pollution has become widespread too. Toxic waste has found its way into our lakes, streams, rivers and oceans. This waste is released by factories and sea-going vessels. Spillage of oil by tankers and during the recent Gulf War has caused irreparable damage to marine life. Thousands of sea animals have died or were poisoned by the pollutants in their natural habitat. As such, it is dangerous for humans to consume sea food caught in polluted waters.
- (7) Dumping of used cars, cans, bottles, plastic items and all other kinds of waste material is an eyesore Much of the refuse is not biodegradable and this interferes with the natural breakdown process of

converting substances from a harmful form to a non harmful one. As such, it becomes a hazard to one's health. We may be unaware of it but noise pollution has been attributed to causing a loss of hearing, mental disturbances and poor performance at work.

- (8) To control environmental pollution, substances which are hazardous and can destroy life must not be allowed to escape into the environment. This calls for united decision-making among world leaders and a public awareness of the dangers of pollution.
  - I. Below are statements summarizing the main ideas of <u>some</u> paragraphs in the passage. Copy each statement in your answer sheet then write the number of the paragraph which includes the idea.
  - 1. The effects of air pollution
  - 2. The impact of pollution on marine life
  - 3. Modern inventions and Pollution
  - 4. What is pollution?
  - 5. Pollution in ancient times

1.	Answer the questions below:
1.	When did pollution begin to be a problem?
2.	How will the rise in the earth's temperature endanger life?
3.	Pollution can be defined as
4.	What is the bad effect of acid rain?

- 5 XX/1-o4 ------- 1---- 1---- 11--4:---- 2
- 5. What causes land pollution?
- II. What do the underlined bold pronouns refer to?
- III. Read these sentences and say whether they are true or false and justify your answer:

1.	Cities of ancient times were always healthy. ( )	
2.	Air is polluted with toxic gases, chemicals and dust. ( )	
3.	With burning of fossil fuels, the level of carbon may increase. ( )	
4.	The effects of pollution on water is limited. ( )	
5.	Noise pollution causes loss of hearing only. ( )	

#### IV-Find words in the passage which mean the following:

1- injured	35.4	paragraph 2	2- danger	paragraph 7
3- joint		paragraph 7		

#### Section Two: Language Skills:

### I. Choose the correct answer to complete the following sentences:

- 1. Some new projects are (opening to open to be opened to opened) soon.
- 2. There isn't (much many a few bed) room in my apartment.
- 3. How (many much often long) comedy works of Shakespeare did you read?
- 4. (A An The Zero Article) ink in my pen is red.
- 5. He and his brother are the same (high tall length height).
- II. The following short text has some grammatical mistakes. Rewrite the text correctly in your paper underlining the changes you have made.

For the last hundred years there has been changes in the weather. As a result the distribution of wild life have been affected. Many European animals have moved northwards. Different species of bird have being seen in Greenland.

# III. Use the following words to write correct definitions in the way you studied in the course.

- 1. Square/ geometric shape/ four equal sides/ right angles
- 2. Encyclopedia/ book/give information/ subjects/ alphabetical order
- 3. Astronomy/ science/ sun, moon, stars, and planets
- 4. A fossil/ an organic trace/ buried/ natural processes

#### IV. Change the following sentences into passive voice:

- 1. They will meet Doris at the station.
- 2. Teachers teach reading in the first grade.
- 3. Michael has not sent me a text message.
- 4. The waiter brought Fred a big steak.

#### V. Fill in the blanks with the appropriate article if one is needed.

Though you can make ----(1) ---- decision on purely economic grounds, buying ---(2)---- computer is often more like joining ---(3)----- religious cult. Buy---(4) ---- Apple, for example, and almost by default you join Apple chairman Steve Jobs in his crusade against IBM. Every machine has its "users' groups" and ---(5)---- band of loyal enthusiasts who tout its merits. That makes it all -----(6)---- more difficult for ---(7)---- uninitiated to decide what machine to buy. Students have---(8)----- huge advantage, however. ---(9)---- computer companies are so eager for students' business (it builds "brand loyalty") that many offer----(10)---- huge discounts.

## Section Three: Writing Skills:

The table below lists some of the similarities and differences between "Red blood cells and White blood cells". Write a paragraph on the differences and similarities using the information given.

	Red Blood Cells	White Blood Cells	
		WBCs/ irregular in shape/ have a nucleus and an outer buffer coat	
Life Span	120 days	4-30 days depending on body	
Types	Only one type of RBCs found in the blood	Various types of WBCs with distinct functions	
Function	Supply oxygen to different parts of the body/ carry carbon dioxide/ other waste	Produce antibodies / develop immunity against infections. Phagocytic cells/ engulf/ microbes	
Production	Produced in red bone marrow	Produced in lymph nodes, spleen, etc.
