Faculty Message

A government educational and research institution, offering study programs in basic sciences for both levels and graduate studies to produce a distinguished graduate and scientific research developed to meet the requirements of society and development of the environment.

Faculty Vision

At the Faculty of Science, Mansoura University, we seek to be among the top ten faculties of basic sciences in The Middle East in the year 2030.

Strategic Goals

- Development of teaching and learning.
- Development of postgraduate programs.
- Developing scientific research in a way that helps the Saudi economic development.
- Promoting development and services.
- Development of development capabilities.
- Developing the college's own resources to support the educational process

Alumni Follow-up

Within the framework of the strategic plan of the Faculty of Science - Mansoura University regarding activating communication between the faculty and the graduates, on 12/01/2007, the Council of the Faculty of Science approved the establishment of an association for faculty graduates to implement the plan of communication between the faculty and the graduates. As the establishment of the association requires routine legal procedures from the Ministry of Social Solidarity. Since communication between the college and its graduates requires flexibility in dealing, the name of the association was changed to the Graduates Association, then to the Alumni Follow-up Unit, Faculty Council, on 9/11/2010.

Unit Message

The Graduate Follow-up Unit of the Community Service and Environmental Development Sector at the Faculty of Science, Mansoura University, seeks to continuously adhere to the requirements of quality assurance by creating effective channels of communication with graduates and civil society for the benefit of society.

Unit Vision

The Graduate Follow-up Unit of the Community Service and Environmental Development Sector at the Faculty of Science, Mansoura University, aspires to achieve a high level of performance in the field of communication with the graduates of the faculty.

About the Unit

The Faculty of Science, Mansoura University, strives to apply quality standards in the educational process, in order to ensure graduating of a distinguished and high-level student who effectively contributes to solving the problems of the surrounding community, and more links with civil society in order to improve the level of graduates in line with the requirements of the labor market to create real opportunities for the graduate and find diverse fields and new job opportunities.

The faculty also sets the standards associated with academic accreditation at the local and international levels to recognize the graduate regionally and globally. Also, the graduate must be permanently connected to the faculty for continuing more academic, training level and knowledge of available job opportunities, building links and cooperation between the faculty and its graduates, seeking to exchange knowledge and experiences with them, inviting them to participate in various events, strengthening their affiliation, and urging them to give and contribute to its service.

Objectives

Follow-up website for graduates at the Faculty of Science, Mansoura University:

- Strengthening communication and strengthening the relationship with graduates to benefit from their work experience.
- Enhancing cooperative education with a number of university external bodies for training in seminars and workshops, participation in events
- Benefit from the experiences of graduates working in their facilities, the teaching staff, in the labor market.
- Developing faculty programs and keeping pace with development plans and requirements.
- Guiding graduates and directing them to available job opportunities.
- Building a real partnership between the Faculty of Science and its graduates in achieving its vision.
- Informing the graduates of all the latest developments in academic matters.
- Create a website for college graduates on the faculty and university website.
- Building a database of college graduates and communicating with them in order to obtain them.
- Inventory and specializations of graduates in order to find job opportunities for them from the faculty announced on the faculty's website.

- Creating a graduate registration form containing all the data and relying on the student's file in order to update the data and submit the graduate follow-up form to the fourth-grade student.
- Establishing a Loyalty Day for the faculty and its graduates.
- Employment Alumni Forum, Employment and Alumni Day every year.
- Annual meetings with faculty graduates.
