## توصیف مقرر در اسی

|                |  | ١ ـ بيانات المقرر          |
|----------------|--|----------------------------|
| المستوى: الاول | Thermal Physics and Properties of Matter: اسم المقرر   | الرمز الكودي :Phys 101     |
| عملی:۲         | عدد الوحدات الدراسية: ٣ ساعات معتمدة نظرى: ٢ تمارين: ١ | التخصص: إحصاء وعلوم الحاسب |

| For students undertaking this course, the aims are to:                                 | ١ - هدف المقرر:  |
|--|--|
| 1- Introducing the students the basics and fundamentals of heat and thermodynamics.    | ۱- هنگ النظرر.   |
| 2- Use the principle of Zeroth law of thermodynamics, thermal expansion of solids      |  |
| and liquids, of gasses.  |  |
| 3- Study the heat and thermal energy, heat capacity and specific heat, latent heat,    |  |
| thermodynamic process and the liquification of gasses                                  |  |
| 4. Introducing the principle of the basics and fundamentals of Properties of matter    |  |
| 5- Study the basic concept of the physical quantities and their units and dimensions.  |  |
| 6- Acquire the student's skills to drive the applications of simple harmonic motion.   |  |
| oscillatory motion   |  |
| 7- Outline the basic information of rotational dynamics, Earth satellites, fluids,     |  |
| surface tension, elasticity.   |  |
| surface tension, elasticity.   | ۲ المستعدف من تدر  |
| a- Knowledge and Understanding :   | ۱ ـ المعلومات<br>أ ـ المعلومات   |
| On completing this course, students will be able to:                                   | <ul> <li>٢- المستهدف من تدر</li> <li>أ- المعلومات</li> <li>والمفاهيم:</li> </ul> |
| al-Know more information about thermal physics and its applications.                   | واعديم.  |
| a2-Define the physial terms like Zeroth law of thermodynamics, thermal expansion of    |  |
| solids and liquids, heat and thermal energy, specific heat and heat capacity.          |  |
| a3-Understand the principles of heat capacity and specific heat to increase the        |  |
| student's knowledge about different behavior of materials.                             |  |
| a4-Define the principles of units and dimensional analysis.                            |  |
| a5-List the basic information of oscillatory motion and rotational dynamics. Earth     |  |
| satellites.  |  |
| a6-Know the student to make experiments in physics lab related to properties of        |  |
| matter course.   |  |
| a7-Recognize the principles of fluids mechanics, surface tension and elasticity to     |  |
| increase the student's knowledge about materials.                                      |  |
| b- Intellectual Skills   | أ- المهارات الذهنية  |
| On completing this course, students will be able to:                                   |  |
| b1-Apply the principles of thermodynamic process and its applications.                 |  |
| b2-Predict thermal behavior of materials by discussing related physical phenomena.     |  |
| b3-Apply more information about properties of matter and their applications.           |  |
| b4-Distinguish between the physial terms like units and dimensions, oscillatory        |  |
| motion, rotational dynamics, Earth satellites, and elasticity.                         |  |
| b5-Analyze the principles of fluids motion and surface tension and their applications. |  |
| b6-Predict behavior of materials by discussing related physical phenomena              |  |
| b7-Apply the mathematical formulas in solving problems.                                |  |
| c- Professional and Practical Skills   | ج- المهارات المهنية  |
| On completing this course, students will be able to:                                   | ج- المهارات المهنية<br>الخاصة بالمقرر:   |
| c1-Choose and classify data obtained from thermal physics experiments                  | •  |
| c2-Design physics experiments to apply thermal physics phenomena in physics lab        |  |

| c3-Design a diagram graph   |                   |  |                            |  |  |
|---|-------------------|--|----------------------------|--|--|
| c4-Reform mathematical fo   |                   |  |                            |  |  |
| physics   |                   |  |                            |  |  |
| c5-Choose and classify dat  |                   |  |                            |  |  |
| of matter course.   |                   |  |                            |  |  |
|   |                   | scillatory motion, fluids, surface tension   |                            |  |  |
| and elasticity in physics la  |                   |  |                            |  |  |
|   | ically for oscill | atory motion, rotational dynamics and        |                            |  |  |
| fluids motion.  |                   |  |                            |  |  |
